Extreme Networks

Extreme Networks Fabric Engine

received NULL vlan from SNAS for non-pc client

Alarm ID

0x001a05a9

Alarm group

0x068 (MOD_SSA)

Details

This message is displayed when a VLAN value of 0 is passed from SNAS for a non-PC client in the client authentication message.

Remedial action

Client authentication will fail - check configuration. Contact customer service and have the following information available: system logs including any memory dumps, switch configuration, and network topology for further analysis.

Remedial action

Check system performance by using the command "show khi performance memory" to see how much memory (DramFree) is available. If DramFree is zero, system has run out of memory. Contact customer service and have the following information available for further analysis: system logs (including any memory dumps), memory usage, switch configuration, and network topology .

Extreme Networks Fabric Engine

cannot allocate memory for ISNODE

Alarm groups ... Alarm IDs

Alarm ID

0x001dc5af

Alarm group

0x077 (MOD_ISIS)

Details

Cannot allocate memory for ISNODE

Remedial action

IS-IS will not start. Check system performance by using the command "show khi performance memory" to see how much memory (DramFree) is available. If DramFree is zero, system has run out of memory. Contact customer service and have the following information available for further analysis: system logs (including any memory dumps), memory usage, switch configuration, and network topology.

CFM config msg failed for rmep [value].[value].[value] (failed to allocate memory)

Alarm groups ... Alarm IDs

Alarm ID

0x001e0586

Alarm group

0x078 (MOD_CFM)

Details

Requested configuration change for the provided MD name, MA name, and RMEP ID failed. Memory issue.

Remedial action

Check system performance by using the command "show sys per" to see how much memory (DramFree) is available. If DramFree is zero, system has run out of memory. Contact customer service and have the following information available for further analysis: system logs (including any memory dumps), memory usage, switch configuration, and network topology.

The requested configuration change failed. Memory issue.

Remedial action

Check system performance by using the command "show sys per" to see how much memory (DramFree) is available. If DramFree is zero, system has run out of memory. Contact customer service and have the following information available for further analysis: system logs (including any memory dumps), memory usage, switch configuration, and network topology.

Alarm ID

0x001e05f0

Alarm group

0x078 (MOD_CFM)

Details

System does not have enough memory to allocate the requested data structure.

Remedial action

Check system performance by using the command "show sys per" to see how much memory (DramFree) is available. If DramFree is zero, system has run out of memory. Contact customer service and have the following information available for further analysis: system logs (including any memory dumps), memory usage, switch configuration, and network topology.

0x07d (MOD_PLSB)

Details

malloc failed.

Remedial action

Check system performance by using the command "show sys per" to see how much memory (DramFree) is available. If DramFree is zero, system has run out of memory. Contact customer service and have the following information available for further analysis: system logs, including any memory dumps, memory usage, switch configuration, and network topology.

Mgmt convert: autosense disable failed on port [value]

Alarm groups ... Alarm IDs

Alarm ID

0x003c8681

Alarm group

0x0f2 (MOD_NLS_BASE)

Details

Port autosense could not be disabled.

Remedial action

Try to manually disable auto-sense on given port before applying convert command.
