Extreme Networks

Extreme Networks Fabric Engine

The type for Internal PSU-[value] does not match the other PSU(s) present. PoE budget is as if all powered PSUs are the lowest wattage PSU.

Alarm groups ... Alarm IDs

Alarm ID

0x000108b1

Alarm group

0x004 (MOD_CHAS_MGR)

Details

The specified power supply is not the same type as the other power supply(s) present. PoE budget is calculated as if all powered PSUs are the lowest wattage PSU. E.g. if one 715W and one 1100W are powered, the PoE budget assumes two 715W PSUs are powered.

Remedial action

Replace the specified power supply with the same power supply type that is already present. Consult the Power Supply section of the Hardware Installation Guide.

Extreme Networks

Extreme Networks Fabric Engine

The vendor for Internal PSU-[value] in slot [value] (P/N [value]) does not match the other PSUs present.

Alarm ID

0x000108b3

Alarm group

0x004 (MOD_CHAS_MGR)

Details

The specified power supply has a different vendor than the other power supply in this switch. It is not recommended to install a Delta and SoluM Power Supply in the same switch.

Remedial action

Replace the specified power supply so that both power supplies are from the same vendor. Consult the Power Supply section of the Hardware Installation Guide.

0x04b (RMOD_ERCD_PORT)

Details

This message is displayed if writing index records to RSP fails, if writing a record into the index table fails, this happens if the data passed is invalid, or RSP is not Up

Remedial action

Ensure that valid data is passed. Contact customer service and have the following information available: system logs including any memory dumps, switch configuration, and network topology for further analysis.

Extreme Networks

Extreme Networks Fabric Engine

Cannot get [value] bytes

Alarm groups ... Alarm IDs

Alarm ID

0x0000459e

Alarm group

0x001 (MOD_SNMP)

Details

This Message appears when the sys can't allocate memory

Remedial action

Check memory stats on master CPU. Contact customer service and have the following information available: system logs including any memory dumps, switch configuration, and network topology for further analysis.

Extreme Networks Fabric Engine

AVL tree node stack array overrun attempted.

Alarm groups ... Alarm IDs

Alarm ID

0x0000468f

Alarm group

0x001 (MOD_SNMP)

Details

This indicates a possible memory issue

Remedial action

Collect the KHI memory stats. Contact customer service and have the following information available: system logs including any memory dumps, switch configuration, and network topology for further analysis.

9037608-00 (Rev. AA) Alarms and Logs Reference for Fabric Engine 8.10 Copyright © Extreme Networks, Inc. 2017-2023. All Rights Reserved

Extreme Networks

Extreme Networks Fabric Engine

Duplicate Nickname [value] detected with our old LSP with system-id [value], ISIS will be disabled globally. Current system-Id [value], current hostname [value]. Wait for our old LSPs to time out before enabling ISIS.

Alarm groups ... Alarm IDs

Alarm ID

0x00004756

Alarm group

0x001 (MOD_SNMP)

Details

The SPB node detected an old incarnation of its LSP with a different system-id, but the same nickname. This could have occured if the system-id and nickname were changed, followed by just the nickname change to the original value before the old LSP timed out.

Remedial action

Wait for the old LSP to age out. Monitor the column LIFETIME in the output of show isis lsdb with the old system-id.
