SPBM ISIS detected duplicate system-id [value] on interface [value]

Alarm groups ... Alarm IDs

Alarm ID

0x00004718

Alarm group

0x001 (MOD_SNMP)

Details

An SPBM ISIS trap that signifies that the system-id is also used by a neighboring system. This is an illegal configuration.

Remedial action

Check the system-id using "show isis system-id" on both local and neighboring systems. If two systems are configured with the same system-id please change it. The system-id must be unique.
