VSP Operating System Software

Alarms (sorted by ID)

Sort by groups

ID	Alarm Description
0x00000001	[value]: out of memory
0x00000002	[value]: malloc failed!
0x00000003	portAddToSlotPollArr: Called with invalid Argument Slot [value]
0x00000004	alsClientRegister returns [value]
0x00000005	IGMP Loss Group Member:MemIpAddr:[value].[value].[value].[value],GrpAddr:[value].[value].[value].[value],src_port:[value],IfIndex:[value]
0x00000006	Port [value] is an access port
0x00000007	IP Interface removed, Delete Rsmlt Node Failed on IfIndex [value], potential memory Leak
0x00000008	IPX Interface removed, Delete Rsmlt Node Failed on Vlan [value], potential memory Leak
0x00000009	SMLT [value] Link is DOWN
0x0000000a	SMLT [value] Link is UP
0x0000000b	Unknown message type [value]
0x0000000c	unrecognized record type [value] from alsRead
0x0000000d	The Number of Ingress Records greater than configured threshold
0x0000000e	[value]: taskSpawn() failed
0x0000000f	SSH Server Disabled
0x00000010	smltProcIpRsmltMsg: set Peer Record fail for Vlan [value]
0x00000011	smltProcessMsgs: Received Unknown message type [value]
0x00000012	smltIstSessionUp
0x00000013	smltIstSessionDown
0x00000014	Range value starting with Zero would disable the parameter
0x00000015	alsWriteClientRecord() failed
0x00000016	cannot allocate filter index object
0x00000017	cannot allocate filter link list object
0x00000018	indexAdd() - failed adding
0x00000019	Link Down([value]/[value])
0x0000001a	Link Down([value]/[value]) due to excessive control frames
0x0000001b	Link Down([value]/[value]) due to ext-cp limit
0x0000001c	Link Down([value]/[value]) due to loop detect
0x0000001d	Link Down([value]/[value]) due to slpp
0x0000001e	Link Up([value]/[value])
0x0000001f	Password modified for user access level RO
0x00000020	Password modified for user access level RW

0x00000021 Password modified for user access level RWA
0x00000022 Password modified for user access level RWL1
0x00000023 Password modified for user access level RWL2
0x00000024 Password modified for user access level RWL3
0x00000025 Port [value] is a brouter port
0x00000026 Port [value] is a trunk port
0x00000027 Port [value] is a trunk port of mlt-[value]
0x00000028 [value]:ltrAlloc FAILED
