VSP Operating System Software

Unable to allocate mirroring resources for ACL ID [value], ACE ID [value].

Alarm groups ... Alarm IDs

Alarm ID

0x001049d8

Alarm group

0x041 (MOD_FILTER)

Details

Resource Manager modelling failed while attempting to add monitor action to ACE. This indicates that all data path resources for mirror destinations are fully utilized.

Remedial action

Delete existing mirroring configuration to free up resources.

Attributes

Name	Value	Description
AlarmType	ALARM_NONE	
Severity	S_ERROR	

9036566-00 VSP Operating System Software - Alarms and References for VOSS Copyright © Extreme Networks, Inc. 2017-2020. All Rights Reserved

VSP Operating System Software

Adding IPv6 and non-IPv6 ACLs on the same [value] can result in unintentional dropping of IPv6 packets, if the non-IPv6 ACL is configured with "default-action deny".

Alarm groups ... Alarm IDs

Alarm ID

0x001049d9

Alarm group

0x041 (MOD_FILTER)

Details

Filters with DENY action have higher priority than PERMIT filters, and an IPv6 filter will always hit the default-action rule of a non-IPv6 filter configured on the same Port or Vlan.

Remedial action

Add additional ACE(s) to the non-IPv6 ACL, to prevent IPv6 packets from hitting the "default-action deny" rule.

rcOspfv3IfTblSetBody: Failed to modify ospf circ dead value

Alarm groups ... Alarm IDs

Alarm ID

0x001085e7

Alarm group

0x042 (MOD_RCIP6)

Details

Category: duReport The system failed to configure the OSPF circuit dead interval value.

Remedial action

Determine if the specified circuit and area exist. Contact customer service and have the following information available for further analysis: system logs (including any memory dumps), switch configuration, and network topology.

Attributes

Name	Value	Description
AlarmType	ALARM_NONE	
Severity	S_ERROR

ipv6RouterAdvertSyncNotify : malloc failed!

Alarm groups ... Alarm IDs

Alarm ID

0x001086b9

Alarm group

0x042 (MOD_RCIP6)

Details

Category: duReport The system memory was depleted during synchronization of the IPv6 route advertisement information with the slave CPU.

Remedial action

Increase DRAM size. Contact customer service and have the following information available for further analysis: system logs (including any memory dumps), switch configuration, and network topology.

Attributes

Name	Value	Description

Unable to free mirroring resource for IPFIX

Alarm groups ... Alarm IDs

Alarm ID

0x00174603

Alarm group

0x05d (MOD_IPFIX)

Details

Resource Manager modelling failed while attempting to free data path mirror destination, for unknown reason. This indicates an internal error condition.

Remedial action

Report the problem to customer service.
