

Release Notes for Ethernet Routing Switch 3600 Series

Release 6.2
9035410
June 2018

© 2018, Extreme Networks, Inc.
All Rights Reserved.

Notice

While reasonable efforts have been made to ensure that the information in this document is complete and accurate at the time of printing, Extreme Networks, Inc. assumes no liability for any errors. Extreme Networks, Inc. reserves the right to make changes and corrections to the information in this document without the obligation to notify any person or organization of such changes.

Documentation disclaimer

"Documentation" means information published in varying mediums which may include product information, operating instructions and performance specifications that are generally made available to users of products. Documentation does not include marketing materials. Extreme Networks shall not be responsible for any modifications, additions, or deletions to the original published version of Documentation unless such modifications, additions, or deletions were performed by or on the express behalf of Extreme Networks. End User agrees to indemnify and hold harmless Extreme Networks, Extreme Networks' agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation, to the extent made by End User.

Link disclaimer

Extreme Networks is not responsible for the contents or reliability of any linked websites referenced within this site or Documentation provided by Extreme Networks. Extreme Networks is not responsible for the accuracy of any information, statement or content provided on these sites and does not necessarily endorse the products, services, or information described or offered within them. Extreme Networks does not guarantee that these links will work all the time and has no control over the availability of the linked pages.

Warranty

Extreme Networks provides a limited warranty on Extreme Networks hardware and software. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Extreme Networks' standard warranty language, as well as information regarding support for this product while under warranty is available to Extreme Networks customers and other parties through the Extreme Networks Support website: <http://www.extremenetworks.com/support> under the link "Policies" or such successor site as designated by Extreme Networks. Please note that if You acquired the product(s) from an authorized Extreme Networks Channel Partner outside of the United States and Canada, the warranty is provided to You by said Extreme Networks Channel Partner and not by Extreme Networks.

"Hosted Service" means an Extreme Networks hosted service subscription that You acquire from either Extreme Networks or an authorized Extreme Networks Channel Partner (as applicable) and which is described further in Hosted SAS or other service description documentation regarding the applicable hosted service. If You purchase a Hosted Service subscription, the foregoing limited warranty may not apply but You may be entitled to support services in connection with the Hosted Service as described further in your service description documents for the applicable Hosted Service. Contact Extreme Networks or Extreme Networks Channel Partner (as applicable) for more information.

Hosted Service

THE FOLLOWING APPLIES ONLY IF YOU PURCHASE AN EXTREME NETWORKS HOSTED SERVICE SUBSCRIPTION FROM EXTREME NETWORKS OR AN EXTREME NETWORKS CHANNEL PARTNER (AS APPLICABLE), THE TERMS OF USE FOR HOSTED SERVICES ARE AVAILABLE ON THE EXTREME NETWORKS WEBSITE, <https://extremeportal.force.com> OR SUCH SUCCESSOR SITE AS DESIGNATED BY EXTREME NETWORKS, AND ARE APPLICABLE TO ANYONE WHO ACCESSES OR USES THE HOSTED SERVICE. BY ACCESSING OR USING THE HOSTED SERVICE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE DOING SO (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THE TERMS OF USE. IF YOU ARE ACCEPTING THE TERMS OF USE ON BEHALF A COMPANY OR OTHER LEGAL ENTITY, YOU

REPRESENT THAT YOU HAVE THE AUTHORITY TO BIND SUCH ENTITY TO THESE TERMS OF USE. IF YOU DO NOT HAVE SUCH AUTHORITY, OR IF YOU DO NOT WISH TO ACCEPT THESE TERMS OF USE, YOU MUST NOT ACCESS OR USE THE HOSTED SERVICE OR AUTHORIZE ANYONE TO ACCESS OR USE THE HOSTED SERVICE.

Licenses

THE SOFTWARE LICENSE TERMS AVAILABLE ON THE EXTREME NETWORKS WEBSITE, <https://extremeportal.force.com> OR SUCH SUCCESSOR SITE AS DESIGNATED BY EXTREME NETWORKS, ARE APPLICABLE TO ANYONE WHO DOWNLOADS, USES AND/OR INSTALLS EXTREME NETWORKS SOFTWARE, PURCHASED FROM EXTREME NETWORKS, INC., ANY EXTREME NETWORKS AFFILIATE, OR AN EXTREME NETWORKS CHANNEL PARTNER (AS APPLICABLE) UNDER A COMMERCIAL AGREEMENT WITH EXTREME NETWORKS OR AN EXTREME NETWORKS CHANNEL PARTNER. UNLESS OTHERWISE AGREED TO BY EXTREME NETWORKS IN WRITING, EXTREME NETWORKS DOES NOT EXTEND THIS LICENSE IF THE SOFTWARE WAS OBTAINED FROM ANYONE OTHER THAN EXTREME NETWORKS, AN EXTREME NETWORKS AFFILIATE OR AN EXTREME NETWORKS CHANNEL PARTNER; EXTREME NETWORKS RESERVES THE RIGHT TO TAKE LEGAL ACTION AGAINST YOU AND ANYONE ELSE USING OR SELLING THE SOFTWARE WITHOUT A LICENSE. BY INSTALLING, DOWNLOADING OR USING THE SOFTWARE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE INSTALLING, DOWNLOADING OR USING THE SOFTWARE (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THESE TERMS AND CONDITIONS AND CREATE A BINDING CONTRACT BETWEEN YOU AND EXTREME NETWORKS, INC. OR THE APPLICABLE EXTREME NETWORKS AFFILIATE ("EXTREME NETWORKS").

Extreme Networks grants You a license within the scope of the license types described below. Where the order documentation does not expressly identify a license type, the applicable license will be a Designated System License as set forth below in the Designated System(s) License (DS) section as applicable. The applicable number of licenses and units of capacity for which the license is granted will be one (1), unless a different number of licenses or units of capacity is specified in the documentation or other materials available to You. "Software" means computer programs in object code, provided by Extreme Networks or an Extreme Networks Channel Partner, whether as stand-alone products, pre-installed on hardware products, and any upgrades, updates, patches, bug fixes, or modified versions thereto. "Designated Processor" means a single stand-alone computing device. "Server" means a set of Designated Processors that hosts (physically or virtually) a software application to be accessed by multiple users. "Instance" means a single copy of the Software executing at a particular time: (i) on one physical machine; or (ii) on one deployed software virtual machine ("VM") or similar deployment.

License type(s)

Designated System(s) License (DS). End User may install and use each copy or an Instance of the Software only: 1) on a number of Designated Processors up to the number indicated in the order; or 2) up to the number of Instances of the Software as indicated in the order, Documentation, or as authorized by Extreme Networks in writing. Extreme Networks may require the Designated Processor(s) to be identified in the order by type, serial number, feature key, Instance, location or other specific designation, or to be provided by End User to Extreme Networks through electronic means established by Extreme Networks specifically for this purpose.

Copyright

Except where expressly stated otherwise, no use should be made of materials on this site, the Documentation, Software, Hosted Service, or hardware provided by Extreme Networks. All content on this site, the documentation, Hosted Service, and the product provided by Extreme Networks including the selection, arrangement and design of the content is owned either by Extreme Networks or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part,

including any code and software unless expressly authorized by Extreme Networks. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Extreme Networks can be a criminal, as well as a civil offense under the applicable law.

Virtualization

The following applies if the product is deployed on a virtual machine. Each product has its own ordering code and license types. Note, unless otherwise stated, that each Instance of a product must be separately licensed and ordered. For example, if the end user customer or Extreme Networks Channel Partner would like to install two Instances of the same type of products, then two products of that type must be ordered.

Third Party Components

"Third Party Components" mean certain software programs or portions thereof included in the Software or Hosted Service may contain software (including open source software) distributed under third party agreements ("Third Party Components"), which contain terms regarding the rights to use certain portions of the Software ("Third Party Terms"). As required, information regarding distributed Linux OS source code (for those products that have distributed Linux OS source code) and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply is available in the products, Documentation or on Extreme Networks' website at: <http://www.extremenetworks.com/support/policies/software-licensing> or such successor site as designated by Extreme Networks. The open source software license terms provided as Third Party Terms are consistent with the license rights granted in these Software License Terms, and may contain additional rights benefiting You, such as modification and distribution of the open source software. The Third Party Terms shall take precedence over these Software License Terms, solely with respect to the applicable Third Party Components to the extent that these Software License Terms impose greater restrictions on You than the applicable Third Party Terms.

The following applies only if the H.264 (AVC) codec is distributed with the product. THIS PRODUCT IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO (i) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD ("AVC VIDEO") AND/OR (ii) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE [HTTP://WWW.MPEGLA.COM](http://WWW.MPEGLA.COM).

Service Provider

THE FOLLOWING APPLIES TO EXTREME NETWORKS CHANNEL PARTNER'S HOSTING OF EXTREME NETWORKS PRODUCTS OR SERVICES. THE PRODUCT OR HOSTED SERVICE MAY USE THIRD PARTY COMPONENTS SUBJECT TO THIRD PARTY TERMS AND REQUIRE A SERVICE PROVIDER TO BE INDEPENDENTLY LICENSED DIRECTLY FROM THE THIRD PARTY SUPPLIER. AN EXTREME NETWORKS CHANNEL PARTNER'S HOSTING OF EXTREME NETWORKS PRODUCTS MUST BE AUTHORIZED IN WRITING BY EXTREME NETWORKS AND IF THOSE HOSTED PRODUCTS USE OR EMBED CERTAIN THIRD PARTY SOFTWARE, INCLUDING BUT NOT LIMITED TO MICROSOFT SOFTWARE OR CODECS, THE EXTREME NETWORKS CHANNEL PARTNER IS REQUIRED TO INDEPENDENTLY OBTAIN ANY APPLICABLE LICENSE AGREEMENTS, AT THE EXTREME NETWORKS CHANNEL PARTNER'S EXPENSE, DIRECTLY FROM THE APPLICABLE THIRD PARTY SUPPLIER.

WITH RESPECT TO CODECS, IF THE EXTREME NETWORKS CHANNEL PARTNER IS HOSTING ANY PRODUCTS THAT USE OR EMBED THE G.729 CODEC, H.264 CODEC, OR H.265 CODEC, THE EXTREME NETWORKS CHANNEL PARTNER ACKNOWLEDGES AND AGREES THE EXTREME NETWORKS CHANNEL PARTNER IS RESPONSIBLE FOR ANY AND ALL RELATED FEES AND/OR ROYALTIES. THE G.729 CODEC IS LICENSED BY SIPRO LAB TELECOM INC. SEE WWW.SIPRO.COM/CONTACT.HTML. THE H.264 (AVC) CODEC IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR

THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO: (I) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD ("AVC VIDEO") AND/OR (II) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION FOR H.264 (AVC) AND H.265 (HEVC) CODECS MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE [HTTP://WWW.MPEGLA.COM](http://WWW.MPEGLA.COM).

Compliance with Laws

You acknowledge and agree that it is Your responsibility for complying with any applicable laws and regulations, including, but not limited to laws and regulations related to call recording, data privacy, intellectual property, trade secret, fraud, and music performance rights, in the country or territory where the Extreme Networks product is used.

Preventing Toll Fraud

"Toll Fraud" is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company's behalf). Be aware that there can be a risk of Toll Fraud associated with your system and that, if Toll Fraud occurs, it can result in substantial additional charges for your telecommunications services.

Security Vulnerabilities

Information about Extreme Networks' security support policies can be found in the Global Technical Assistance Center Knowledgebase at <https://gtacknowledge.extremenetworks.com/>.

Downloading Documentation

For the most current versions of Documentation, see the Extreme Networks Support website: <http://documentation.extremenetworks.com>, or such successor site as designated by Extreme Networks.

Contact Extreme Networks Support

See the Extreme Networks Support website: <http://www.extremenetworks.com/support> for product or Hosted Service notices and articles, or to report a problem with your Extreme Networks product or Hosted Service. For a list of support telephone numbers and contact addresses, go to the Extreme Networks Support website: <http://www.extremenetworks.com/support/contact/> (or such successor site as designated by Extreme Networks), scroll to the bottom of the page, and select Contact Extreme Networks Support.

Trademarks

The trademarks, logos and service marks ("Marks") displayed in this site, the Documentation, Hosted Service(s), and product(s) provided by Extreme Networks are the registered or unregistered Marks of Extreme Networks, Inc., its affiliates, its licensors, its suppliers, or other third parties. Users are not permitted to use such Marks without prior written consent from Extreme Networks or such third party which may own the Mark. Nothing contained in this site, the Documentation, Hosted Service(s) and product(s) should be construed as granting, by implication, estoppel, or otherwise, any license or right in and to the Marks without the express written permission of Extreme Networks or the applicable third party.

Extreme Networks is a registered trademark of Extreme Networks, Inc.

All non-Extreme Networks trademarks are the property of their respective owners. Linux[®] is the registered trademark of Linus Torvalds in the U.S. and other countries.

For additional information on Extreme Networks trademarks, please see: <http://www.extremenetworks.com/company/legal/>

Chapter 1: Preface

Purpose

This document describes new features, hardware, upgrade alerts, known and resolved issues, and limitations for Extreme Networks Ethernet Routing Switch 3600 in this software release.

Training

Ongoing product training is available. For more information or to register, you can access the Web site at www.extremenetworks.com/education/.

Providing Feedback to Us

We are always striving to improve our documentation and help you work better, so we want to hear from you! We welcome all feedback but especially want to know about:

- Content errors or confusing or conflicting information.
- Ideas for improvements to our documentation so you can find the information you need faster.
- Broken links or usability issues.

If you would like to provide feedback to the Extreme Networks Information Development team about this document, please contact us using our short [online feedback form](#). You can also email us directly at internalinfodev@extremenetworks.com

Getting Help

If you require assistance, contact Extreme Networks using one of the following methods:

- [GTAC \(Global Technical Assistance Center\) for Immediate Support](#)
 - Phone: 1-800-998-2408 (toll-free in U.S. and Canada) or +1 408-579-2826. For the support phone number in your country, visit: www.extremenetworks.com/support/contact

- Email: support@extremenetworks.com. To expedite your message, enter the product name or model number in the subject line.
- [GTAC Knowledge](#) – Get on-demand and tested resolutions from the GTAC Knowledgebase, or create a help case if you need more guidance.
- [The Hub](#) – A forum for Extreme customers to connect with one another, get questions answered, share ideas and feedback, and get problems solved. This community is monitored by Extreme Networks employees, but is not intended to replace specific guidance from GTAC.
- [Support Portal](#) – Manage cases, downloads, service contracts, product licensing, and training and certifications.

Before contacting Extreme Networks for technical support, have the following information ready:

- Your Extreme Networks service contract number and/or serial numbers for all involved Extreme Networks products
- A description of the failure
- A description of any action(s) already taken to resolve the problem
- A description of your network environment (such as layout, cable type, other relevant environmental information)
- Network load at the time of trouble (if known)
- The device history (for example, if you have returned the device before, or if this is a recurring problem)
- Any related RMA (Return Material Authorization) numbers

Extreme Networks Documentation

To find Extreme Networks product guides, visit our documentation pages at:

Current Product Documentation

www.extremenetworks.com/documentation/

Archived Documentation (for previous versions and legacy products)

www.extremenetworks.com/support/documentation-archives/

Release Notes

www.extremenetworks.com/support/release-notes

Open Source Declarations

Some software files have been licensed under certain open source licenses. More information is available at: www.extremenetworks.com/support/policies/software-licensing.

Subscribing to Service Notifications

Subscribe to receive an email notification for product and software release announcements, Vulnerability Notices, and Service Notifications.

About this task

You can modify your product selections at any time.

Procedure

1. In an Internet browser, go to <http://www.extremenetworks.com/support/service-notification-form/>.
2. Type your first and last name.
3. Type the name of your company.
4. Type your email address.
5. Type your job title.
6. Select the industry in which your company operates.
7. Confirm your geographic information is correct.
8. Select the products for which you would like to receive notifications.
9. Click **Submit**.

Chapter 2: New in this Release

The following sections detail what is new in this ERS 3600 Release 6.2.

Download PoE Firmware from SFTP

This release adds support for downloading PoE firmware from SFTP.

For more information about PoE, see *Configuring Systems on Ethernet Routing Switch 3600 Series*.

Enabling EAPOL and IP Source Guard Simultaneously on a Port

This release supports the ability to run EAP and IP Source Guard simultaneously on a port.

For more information about EAPOL and IP Source Guard, see *Configuring Security on Ethernet Routing Switch 3600 Series*.

Edge Automation Enhancements

This release supports dynamic configuration of ports and VLANs that have users or devices connected to them, such as IP cameras, or Access Points.

RADIUS service requests are specified using the Fabric-Attach-Service-Request VSA.

For more information about Edge Automation enhancements, see *Configuring Fabric Attach on Ethernet Routing Switch 3600 Series*.

Fabric Attach Bindings Increase

In this release, the number of Fabric Attach bindings has increased from 16 bindings per port to 94 bindings per port. The bindings have increased system-wide, which means that any port can have up to 94 bindings.

For more information about Fabric Attach, see *Configuring Fabric Attach on Ethernet Routing Switch 3600 Series*.

Fabric Attach Enhancements

This release supports Management VLAN Advertisement Blocking and Automatic Management VLAN Assignment. see *Configuring Fabric Attach on Ethernet Routing Switch 3600 Series*.

MIB Enhancements

This release adds the following MIB enhancements so that Extreme Management Center can be supported:

- Entity MIB
- Dot1Q MIB
- P-Bridge MIB

For more information about Entity MIB, Dot1Q MIB, and P-Bridge MIB, see *Configuring Security on Ethernet Routing Switch 3600 Series*.

NEAP Password Format

This release introduces support for Non-EAP freeform Password.

For more information, see *Configuring Security on Ethernet Routing Switch 3600 Series*.

RFC 4675 RADIUS Attributes: Egress-VLANID and Egress-VLAN-NAME

This release supports two standard RADIUS attributes defined in RFC 4675: Egress-VLANID and Egress-VLAN-NAME to control 802.1Q tagging for traffic egressing a port where RADIUS authentication was performed for a connected EAP or non-EAP client.

For more information, see *Configuring Security on Ethernet Routing Switch 3600 Series*.

User Based Policies

This release supports User Based Policies (UBP). You can configure the switch to manage access with UBPs. Users can be associated with a specific interface, user role, user name string and user group setting.

For more information, see *Configuring Quality of Service on Ethernet Routing Switch 3600 Series*

SFP+ stacking interfaces default mode

In this release, the SFP+ stacking interfaces default mode is changed to stacking.

```
Switch(config)#default stacking-ports mode
Switch(config)#show stacking-ports mode
Current stacking-ports mode: Stacking Mode
```

Viewing EAP Unauthenticated Clients

This release provides EDM support to view EAP and Non-EAP unauthenticated clients.

For more information, see *Configuring Security on Ethernet Routing Switch 3600 Series*.

Overview of features by release

This section provides an overview of the ERS 3600 software features up to Release 6.2.

The following table lists software features in *Using CLI and EDM on Ethernet Routing Switch 3600 Series*.

Feature	New in this release	
	6.0	6.1
CLI pipe filter	x	
ASCII Config File	x	
HTTP web-based management	x	
Show Running Config (verbose, non-verbose, module) enhancement	x	
WEB HTTP download of ASCII — downloading of ASCII configuration files through HTTP	x	
Writemem and save config command	x	

This following table lists software features in *Quick Start Configuration for Ethernet Routing Switch 3600 Series*.

Feature	New in this release	
	6.0	6.1
802.3af (Power over Ethernet —PoE) and 802.3at (PoE+)	x	
802.3x (Flow Control – Gig ports only)	x	
ACG (ASCII Config Generator)	x	
Agent Auto Unit Replacement (AAUR)	x	
Auto save Disable	x	
Autosave configuration enhancements	x	
BootP or Default IP	x	
BootP/TFTP for downloading software and config file	x	
CLI Quick Start script	x	
DNS – Domain Name Service capa	x	
Downloading agent without reset	x	
Factory-default command	x	
No Banner & CTRL-Y Skip	x	
Ping enhancement	x	
Port Naming	x	
Run IP Office Script	x	
Show software status	x	
Telnet (up to 4 sessions)	x	
Telnet out – ability to open telnet sessions from the box	x	
Username Password Enhancement	x	

This following table lists software features in *Configuring VLANs, Spanning Tree, and Multi-Link Trunking on Ethernet Routing Switch 3600 Series*.

New in this Release

Feature	New in this release	
	6.0	6.1
256 port-based VLANs with IVL.	x	
802.3ad- Link Aggregation Control Protocol (LACP)	x	
802.1Q tagging	x	
802.1w – rapid spanning tree	x	
Autotopology	x	
BPDU Filtering	x	
Default settings for Spanning Tree mode		x
Distributed LAG (802.3ad LACP), up to 6 trunks with 4 links per trunk	x	
Distributed MLT (DMLT), up to 6 trunks with 4 links per trunk	x	
IPv6 VLANs (protocol based)	x	
LAG (802.3ad LACP), up to 6 trunks with 4 links per trunk	x	
MAC flush	x	
MLT enable/disable whole trunk	x	
MLT/DMLT/LAG dynamic add/delete	x	
Multi-Link Trunking (MLT) with up to 6 trunks and 4 links per trunk	x	
Show MAC Address enhancement	x	
Single 802.1d Spanning Tree Protocol (STP) on all ports	x	
SLPP Guard	x	
Spanning Tree 802.1d compliance mode	x	
Spanning Tree port mode	x	
Static LACP key to trunk ID binding	x	
Static STP Multicast Destination Configuration	x	
VLACP	x	
VLAN Tagging Enhancement	x	
Voice VLAN Integration	x	

This following table lists software features in *Configuring System Monitoring on Ethernet Routing Switch 3600 Series*.

Feature	New in this release	
	6.0	6.1

Table continues...

Auto Detection And Configuration (ADAC) with 802.1AB interaction	x	
CPU & Memory Utilization	x	
Cumulative system uptime	x	
Dual Syslog servers	x	
Identify Units (Blink LEDs)	x	
Port mirroring (1-1, manytoOne)	x	
Remote Logging - ability to log on remote servers	x	
RMON (RFC1757): per port Statistics, History, Alarm and Events	x	
Secure SLA Monitor agent-server communication	x	
Service Level Agreement (SLA) Monitor	x	
Show environmental	x	
SLAMon	x	
SLAMon phase 2 (including EDM)	x	
SNMP MIB web page in EDM	x	
SNMP Trap list web page in EDM	x	
Software Exception Log	x	
Stack Health Check	x	
Syslog	x	
Syslog enhancements	x	
Unit Stack Uptime	x	

This following table lists software features in *Configuring IP Routing and Multicast on Ethernet Routing Switch 3600 Series*.

Feature	New in this release	
	6.0	6.1
DHCP Client	x	
DHCP Option 82	x	
DHCP Relay	x	
DHCP Server	x	
IGMP Selective Channel Block		x
IGMPv1/v2 snooping/proxy	x	
IGMPv3 Snooping/proxy	x	
IP Blocking	x	
IP Local Static Routes	x	
IP Non-Local Static Routes	x	

Table continues...

New in this Release

L3 - RIPv1v2	x	
MLD Proxy (MLDv1/MLDv2)	x	
MLD snooping (MLDv1/MLDv2)	x	
Proxy ARP	x	
RIP Policies	x	
Static Routing with default route	x	
UDP Forwarding	x	

This following table lists software features in *Configuring Quality of Service on Ethernet Routing Switch 3600 Series*.

Feature	New in this release		
	6.0	6.1	6.2
Advanced QoS	x		
Automatic QoS	x		
COS/DSCP — mapping the DSCP value	x		
Traffic Profile	x		
User Based Policies			x

This following table lists software features in *Configuring Security on Ethernet Routing Switch 3600 Series*.

Feature	New in this release		
	6.0	6.1	6.2
802.1X EAP Accounting	x		
802.1X EAP (MHSA, MHMV, Guest VLAN, Fail Open VLAN, Non-EAP, and RADIUS MAC)	x		
802.1X EAP Separate enable/disable	x		
802.1X Enhancement: Dynamic VLAN assignment for NEAP	x		
802.1X Enhancement: Unicast request, Non-EAP IP Phone support	x		
802.1X NEAP Accounting	x		
802.1X NEAP and Guest VLAN on same port	x		
802.1X NEAP Fail Open VLAN	x		
802.1X NEAP Phone Support	x		
802.1X NEAP re-authentication timer	x		
802.1X NEAP with VLAN names	x		
802.1X RFC2866/2869 RADIUS interim accounting updates	x		

Table continues...

802.1X RFC3576 RADIUS auth extensions - CoA and DM	x		
ARP Inspection	x		
Configurable SNMP trap port (only SNMP v1 & v2)	x		
DA Filtering	x		
Default all EAP settings	x		
DHCPv6 filtering	x		
DHCP Snooping	x		
Duplicate Address Detection (DAD) snooping and filtering	x		
Dynamic "IPv6 Neighbor solicitation/advertisement" inspection	x		
EAP enhancements		x	
Enabling EAP and IP Source Guard simultaneously on a port			x
Extended IP Manager (IPv4 & IPv6)	x		
HTTP port change	x		
HTTPS/SSL secure web management	x		
IPv6 Source Guard	x		
IPv6 Enhancements - IPv6 Host Enhancement and IPv6 Loopback	x		
IPV6 First Hop Security	x		
Local password protection	x		
MAC address based security with autolearn (BaySecure)	x		
MIB enhancements — Entity MIB, Dot1Q MIB, P-Bridge			x
Multiple Host with Multiple VLANs (MHMV)	x		
Multiple Host with Single Authentication (MHSA) — No limit	x		
NEAP Not Member of VLAN	x		
NEAP password format			x
Neighbor Unreachability Detection (NUD) filtering	x		
Password security	x		
RADIUS-based security	x		
RADIUS EAP / NEAP to different servers	x		
RADIUS password fallback	x		
RADIUS Server reachability	x		

Table continues...

New in this Release

RADIUS use-management-ip	x		
RFC 4675 — RADIUS Attributes: Egress-VLANID and Egress-VLAN-NAME			x
Router Advertisements (RA) filtering	x		
Secure FTP (SFTP) – full support	x		
SNMP-based network management	x		
SNMP trap enhancements	x		
SNMPv3 security	x		
SSH enhancement to support RSA	x		
SSHv2	x		
Stack Monitor and Statistics	x		
Sticky MAC	x		
Storm Control	x		
TACACS+	x		
Unified Authentication	x		
Viewing EAPOL Unauthenticated clients in EDM			x

This following table lists software features in *Configuring Fabric Attach on Ethernet Routing Switch 3600 Series*.

Feature	New in this release		
	6.0	6.1	6.2
Edge Automation Enhancements			x
Fabric Attach	x		
Fabric Attach Proxy	x		
Fabric Attach Bindings Increase			x
Fabric Attach enhancements — Dynamic Trusted QoS interface updates, Tagging mode on FA Client port, Viewing authentication status related to FA and I-SID/ VLAN Assignment TLV in CLI output for show fa elements command, FA statistics, Dual Key Authentication		x	
Fabric Attach enhancements — Management VLAN Advertisement Blocking and Automatic Management VLAN Assignment			x

This following table lists software features in *Configuring Systems on Ethernet Routing Switch 3600 Series*.

Feature	New in this release		
	6.0	6.1	6.2

Table continues...

802.1AB (LLDP) Standards Based Auto Topology	x		
802.1AB and ADAC interoperability	x		
802.1AB Customization features	x		
802.1AB Integration features	x		
802.1AB Location TL	x		
802.1AB MED	x		
Auto Unit Replacement (AUR) per trunk	x		
Extreme Networks Energy Saver	x		
Backup configuration	x		
Custom Autonegotiation Advertisements (CANA)	x		
Configure Asset ID	x		
Download PoE firmware from SFTP			x
IPv6 Management	x		
Low PoE power mode		x	
Manual-MDI/X	x		
PoE enhancements		x	
Rate Limiting	x		
Show Flash History	x		
Show UTC Timestamp	x		
Shutdown, reload enhancement	x		
SNTP and SNTP timezone enhancement	x		
Stack Forced Mode	x		
Stack IP Address	x		
Time Domain Reflectometer		x	
Video Surveillance Script	x		

Chapter 3: Important notices

This section provides important software and hardware related notices.

File names

The following table describes the software files for ERS 3600 Series Software Release 6.2.

Module or file type	Description	File name	File size (bytes)
SSH runtime image	Software image for the Ethernet Routing Switch 3600 Series	ers3600_620057s.img	15,561,960
Diagnostic software	Diagnostic software for the Ethernet Routing Switch 3600 Series	3600_6003_diags.bin	7,096,944
MIB definition files	Management Information Base (MIB) definition files	Ethernet_Routing_Switch_36xx_MIBs_6.2.0.zip	1,625,650
EDM Help file zip	A downloadable zip file containing Help information for Enterprise Device Manager (EDM)	ers3600v620_HELP_EDM.zip	2,749,921
COM Plug in file zip	COM Plug in for Enterprise Device Manager (EDM)	ers3600v6.2.0.0.zip	4,197,601

Upgrading the Diag image using CLI

Perform the following procedure to upgrade the Diag image using CLI.

Procedure

1. Connect a default switch to a TFTP server.
2. Set a valid IP address and subnet mask.

3. Configure the TFTP server address using the following command from Privileged EXEC mode:

```
tftp-server <A.B.C.D>
```

4. Verify the connection to the TFTP Server.
5. At the command prompt, enter the **download** command with the following parameters.

```
download diag <WORD>
```

The Diag image is downloaded and then the switch is rebooted. To avoid rebooting the switch after the download, add the option *<no-reset>* to the **download** command.

Variable definitions

The following table describes the parameters for the **download** command.

Variable	Value
<A.B.C.D>	Enter the IP address of the TFTP server in the format XXX.XXX.XXX.XXX
<WORD>	The filename of the diagnostic image

Updating the Diag image from the Boot menu

Procedure

1. Connect a default switch to a TFTP server.
2. Reboot the switch (either a soft or hard reset).
3. During the boot process, press **CTRL+C** until the following menu is displayed:

```
DIAGNOSTIC BREAK MENU

 1 - Launch Primary Agent-1
 2 - Download Agent/Diag
 3 - Reinitialize Agent Configuration Files
 4 - Display Error Log
 5 - Display System Information
 6 - Continue Boot Sequence
 7 - Reset
 8 - Toggle Do-POST Selection [ENABLED]
 9 - Run POST tests
```

4. Press **`2`**.
5. Choose option: 3 - Diagnostics.

6. Choose option: 1 – Download via TFTP.
7. Enter the filename, along with its extension; for example `_diag.bin`.
8. Enter the TFTP server IP address.
9. Enter the switch IP address.
10. Enter the subnet mask.
11. Enter the port in which the cable is connected.

The download of the DIAG image begins.

Supported software and hardware capabilities

The following table summarizes the known capabilities for the ERS 3600 Series software.

Table 1: Supported capabilities for the ERS 3600 Series

Feature	Maximum number supported
QoS egress queues	4
QoS filters per precedence	256
QoS precedence	8
Total QoS filters	(4 x 256) = 1024
MAC addresses	16000
Layer 2	
VLANs	256
IGMP SCB filters	240
Multiple Spanning Tree Instances (MSTI) in MSTP mode	8
Multicast entries (IPv4 and IPv6)	248
IGMP Snoop VLANs	256
LLDP Neighbors (3626/3650)	416/800
LLDP Neighbors per port	16
MultiLink Trunking (MLT), Link Aggregation (LAG) groups	6
Links for each MLT or LAG	4
Layer 3	
ARP entries (local, static & dynamic)	512 (of which 32 are reserved for local ARPs)
Local ARP Entries (local IP interfaces)	32
Static ARP entries	256

Table continues...

Feature	Maximum number supported
Dynamic ARP entries	480
IPv4 route entries (local, static & dynamic)	32 local + 32 static + 256 dynamic
Static routes and Non-local Static routes	32
Local routes	32
Management routes	4
RIP routes	256
RIP Interfaces	16
UDP Forwarding entries	128
DHCP relay entries	256
DHCP relay forward paths	256
DHCP Server Pools	16 (one per VLAN)
DHCP Server clients per pool	256
DHCP Server clients per switch/stack	2000
IPv6 Interfaces	64
IPv6 Static Routes	128
Miscellaneous	
802.1X EAP scaling (clients for each port)	32
Jumbo frame support	9 K bytes
IGMP multicast groups	248
802.1X (EAP and NEAP) clients per stack	768
RMON alarms	400
RMON events	400
RMON Ethernet statistics	128 per unit
RMON Ethernet history	196 per unit
Fabric Attach operational mode	Proxy
Fabric Attach clients –proxy requests (proxy VLANs)	256

Supported standards RFCs and MIBs

Standards

The standards in the following list are supported on the switch:

- IEEE 802.1AB (Link Layer Discovery Protocol (LLDP) and LLDP-Media Endpoint Discover (LLDP-MED))

Important notices

- IEEE 802.1Q (VLANs)
- IEEE 802.1p (Priority Queues)
- IEEE 802.1D (Spanning Tree)
- IEEE 802.1w (Rapid Spanning Tree)
- IEEE 802.1s (Multiple Spanning Tree Groups)
- IEEE 802.1X (Extensible Authentication Protocol (EAP))
- IEEE 802.3 (10BASE-T/100BASE-TX)
- IEEE 802.3u (100BASE-T (ANSI) Auto-Negotiation)
- IEEE 802.3x (Pause Frames / Flow Control)
- IEEE 802.3z (1000BASE-X)
- IEEE 802.3ab (1000BASE-T)
- IEEE 802.3ad (Link Aggregation Control Protocol (LACP))
- IEEE 802.3af (PoE) – 15.4W max
- IEEE 802.3aq (10GBASE-LRM 10 Gbit/s Ethernet over fiber)
- IEEE 802.3at (Power over Ethernet plus— PoE+ (32W))
- IEEE 802.3az Energy Efficient Ethernet (EEE)

RFCs and MIBs

For more information about networking concepts, protocols, and topologies, consult the following RFCs and MIBs:

- RFC 783 Trivial File Transfer Protocol (TFTP)
- RFC 791/ 950 Internet Protocol (IP)
- RFC 792 Internet Control Message Protocol (ICMP)
- RFC 826 Address Resolution Protocol (ARP)
- RFC 854 Telnet Server and Client
- RFC 951/ 1542 (BOOTP)
- RFC 1058 RIPv1
- RFC 1112 Internet Group Management Protocol v1 (IGMPv1)
- RFC 1213 MIB-II
- RFC 1215 SNMP Traps Definition
- RFC 1271 / 1757 / 2819 RMON
- RFC 1361 / 1769 Simple Network Time Protocol (SNTP)

- RFC 1493 (Bridge MIB)
- RFC 1573 / 2863 Interface MIB
- RFC 1643 / 2665 Ethernet MIB
- RFC 1905 / 3416 SNMP
- RFC 1906 / 3417 SNMP Transport Mappings
- RFC 1907 / 3418 SNMP MIB
- RFC 1945 HTTP v1.0
- RFC 1981 Path MTU Discovery for IPv6
- RFC 2011 SNMP v2 MIB for IP
- RFC 2012 SNMP v2 MIB for TCP
- RFC 2013 SNMP v2 MIB for UDP
- RFC 2131 DHCP Client
- RFC 2132 DHCP Options 6, 43 & 60
- RFC 2138 RADIUS
- RFC 2236 Internet Group Management Protocol v2 (IGMPv2)
- RFC 2453 RIPv2
- RFC 2460 Internet Protocol v6 (IPv6) Specification
- RFC 2461 Neighbor Discovery for IPv6
- RFC 2462 Auto-configuration of link local addresses
- RFC 2464 IPv6 over Ethernet
- RFC 2474 Differentiated Services Support
- RFC 2570 / 3410 SNMPv3
- RFC 2571 / 3411 SNMP Frameworks
- RFC 2572 / 3412 SNMP Message Processing
- RFC 2573 / 3413 SNMPv3 Applications
- RFC 2574 / 3414 SNMPv3 USM
- RFC 2575 / 3415 SNMPv3 VACM
- RFC 2576 / 3584 Co-existence of SNMP v1/v2/v3
- RFC 2616 HTTP
- RFC 2660 HTTPS (Secure Web)
- RFC 2665 Ethernet MIB
- RFC 2674 Q-Bridge MIB

Important notices

- RFC 2710 MLDv1 for IPv6
- RFC 2737 Entity MIBv2
- RFC 2819 RMON MIB
- RFC 2863 Interfaces Group MIB
- RFC 2866 RADIUS Accounting
- RFC 2869 RADIUS Extensions (interim updates)
- RFC 3046 (& 5010) DHCP option 82, Relay Agent Information Option
- RFC 3058 RADIUS Authentication
- RFC 3361 DHCP option 120 SIP Servers
- RFC 3376 Internet Group Management Protocol v3 (IGMPv3)
- RFC 3484 Default Address Selection for IPv6
- RFC 3576 RADIUS Change of Authorization
- RFC 3596 DNS Extensions for IPv6
- RFC 3810 MLDv2 for IPv6
- RFC 3879 Deprecating Site Local Addresses
- RFC 4007 Scoped Address Architecture
- RFC 4022 MIB for TCP
- RFC 4113 MIB for UDP
- RFC 4193 Unique Local IPv6 Unicast Addresses
- RFC 4252 SSH
- RFC 4291 IPv6 Addressing Architecture
- RFC 4293 MIB for IP
- RFC 4301 Security Architecture for the Internet Protocol
- RFC 4432 SSHv2 RSA
- RFC 4443 Internet Control Message Protocol (ICMPv6) Update to RFC 2463
- RFC 4541 IGMP and MLD Snooping Switches Considerations
- RFC 4675 RADIUS Attributes for VLAN and Priority Support
- RFC 4861 Neighbor Discovery for IPv6
- RFC 4862 IPv6 Stateless Address Autoconfig
- RFC 5095 Deprecation of Type 0 Routing Headers in IPv6
- RFC 5859 TFTP Server DHCP option

Chapter 4: Resolved issues

The following table lists the issues resolved in the current software release.

Reference number	Description
ERS3600–356	USB- Wrong error message when try to download diag/image to USB and USB port is disabled
ERS3600–380	COM: EDM Offbox: AES - Wrong error message when try to delete a schedule when AES is active
ERS3600–385	COM: EDMoffbox - inconsistent value displayed when trying to disable faElementType & falsidVlanAsgns TLVs from LLDP menu
ERS3600–403	COM/EDM-offbox: QoS traffic-profile is not implemented in EDM off-box
ERS3600–418	EDM: USB support for ASCII config file tab does not exist in EDM
ERS3600–425	Stack- Link leds for stacking ports are not lit. The Stacking ports have been migrated to the front of the switch, and the ports can be used either as Stacking or as Standalone 10G ports. <ul style="list-style-type: none"> • When used as Stacking ports, the LEDs on the left of the switch indicate Stack port status. The Stack Up and Stack Down LED's are updated as the Stack ports become active or idle. Their local port LEDs do not indicate Stack port status. • When used as Standalone ports, the local LEDs indicate port status, like all other ports.
ERS3600–459	Inconsistency between CLI and EDM: Track All Mac should be implemented in EDM.
ERS3600-508	DHCP Snooping is not updated with end-user IP address and sometime end-user cannot obtain an IP address
ERS3600–515	No MAC learning after upgrade to 7.4 for POE device with FA enabled
ERS3600–518	Unable to configure call server IP in this range (x.x.x.224 through x.x.x.255) for LLDP
ERS3600–520	Mac-address of the PC not learned on a EAP port after force authorization on that port
ERS3600–521	End-user loses network connection through ERS3600 with DAI and IPSPG configuration
ERS3600–526	Random ports show negative value for last change field

Table continues...

Resolved issues

Reference number	Description
ERS3600-560	When COM+ monitoring tool discovery ARP ingresses management VLAN on a non-base unit port, ERS4800 does not send ARP reply back.
ERS3600-562	Memory leak visible when processing IGMPv3 packets; IGMPv1/v2 not affected
ERS3600-568	Clients are unable to receive IP address from /25 or /26 subnet with DHCP relay configured.
ERS3600-569	EAP authenticated clients fail into Guest VLAN a few times per hour.
ERS3600-570	Duplex inter-operate issue between ERS 3600 and Tenor AF Series AFG800 when port auto negotiation and Auto-MDIX is disabled.
ERS3600-578	Issue with the switch in assigning untagged VLAN via IDE (RFC-4675).
ERS3600-593	Radius reachability issue on 3rd unit, client MAC is put into Fail Open VLAN.
ERS3600-600	OID for Physical Manufacture date is not working.
ERS3600-601	1GB SM/MM GBIC not recovering after Power Cycle.
ERS3600-623	Lost VLAN configuration on unit two when two separate units are joined to form a stack
ERS3600-625	Ports of the same MLT got different tag settings in an uncommon scenario.
ERS3600-626	FA ports settings lost for QOS defined group.
ERS3600-631	Switch does not forward DHCP traffic to user on some ports.
ERS3600-635	EAPOL Multihost NON-EAP won't pass traffic after changing from Auto to Authorized.
ERS3600-636	MAC Security Action for Trap is incorrectly displayed in EDM

Chapter 5: Known issues and limitations

The following table lists and describes known issues and limitations. Where available and appropriate, workarounds are provided.

Reference number	Description
ERS3600–69	Inconsistency between CLI and EDM: In EDM it should exist a tab in the folder RUN script for RUN VS.
ERS3600–310	EAP: Auto-configured VLAN should be deleted when NEAP clients are disconnected  Note: Removing all authenticated clients on a dynamically autocreated VLAN by EAP, may cause that auto-created VLANs to not be deleted under some circumstances.
ERS3600–345	EDM offbox: After creating vlan from EDM offbox with assigned IP address, the vlan created in EDM offbox are displayed in ACG in incorrect order in module I3-protocols.
ERS3600–404	COM: Error "CommitFailed" when configuring DHCPv6 Guard ServerAccessListName and ReplyPrefixListName with invalid values in EDMOffBox.
ERS3600–426	EDM: Port status is not updated instantly when link state changes.
ERS3600–432	EDM: Refresh button in EDM does not function. Workaround: Use the F5 function key.
ERS3600–435	Disabled SFP Ports do not flash when disabled.
ERS3600–450	Cannot upload ASCII config when vlans dynamically created are present (FA, EAP). The VLANs created dynamically are not automatically re-created after a device reboot. When executing a ASCII config file (after a reboot) the CLI commands that are using these VLANs will fail. Manual re-creation of the missing VLANs is recommended before executing the ASCII script.
ERS3600–485	FA ZT EDM: Should not accept auto-port-mode-fa-client and auto-pvid-mode-fa-client enabled at the same time  Note: When both policies are configured, only the one that was configured first is applied.

Table continues...

Reference number	Description
ERS3600-486	<p>FA ZT EDM: Should not accept auto-port-mode-fa-client and auto-client-attach enabled at the same time.</p> <p>* Note: When both policies are configured, only the one that was configured first is applied.</p>
ERS3600-505	<p>FA transition from stack to standalone: FA ZT policy is not applied on AP after transition</p> <p>Workaround: In case that the FA ZT policy is not applied on a AP after transition from stack to standalone, do the following:</p> <ul style="list-style-type: none"> • Make sure there is only a single connection to the server. • Eliminate the other proxy connections (proxy to proxy is not supported). • Delete the binding data configured on the AP so that the only configuration being installed is the ZTC data.
ERS3600-519	<p>Autosave won't re-enable after reload is canceled without reboot when ASCII config not available.</p> <p>The autosave is not re-enabled when a reload is activated then canceled. A device reboot is required for the autosave activation.</p>
ERS3600-523	<p>EDM does not display any link info about stacking ports in stack mode in device physical view.</p> <p>In the stacking mode the number of available ports is 26/50 (the stacking ports are not counted); therefore, there are no instances of the SNMP objects for the stacking ports.</p>
ERS3600-613	<p>Logs are seen on the FA server stating that the maximum number of bindings has been reached.</p>
ERS3600-630	<p>FA: VLAN pushed by AP authenticated by RADIUS is not removed from device after stack standalone transition and it is not seen as auto-created.</p> <p>To recover from this state, reboot the entire stack and the FA server to remove the VLANs.</p>
ERS3600-637	<p>FA: MLT uplink port changes status from admin disable to admin enable after unit is rebooted.</p> <p>To recover from this state, shut down the port after reboot.</p> <p>Workaround: Disable FA before shutting down the port, or shut down all MLT ports, or reboot the whole stack.</p>
ERS3600-638	<p>FA: Port tagging is reverted from tagall to untagall on uplink port to an FA Server after BU failover.</p> <p>To recover from this state, disable FA on uplink ports, configure tagging back to untagall and then re-enable FA afterwards.</p> <p>Workaround: Enable tagging tagall on all trunk ports to FA server before FA Server is discovered initially.</p>

Table continues...

Reference number	Description
ERS3600-639	<p data-bbox="500 239 1464 302">FA: Port tagging is not reverted for uplink ports to an FA Server when disabling FA on the FA Proxy side.</p> <p data-bbox="500 321 1045 352">To recover from this state, reconfigure tagging.</p> <p data-bbox="500 369 1365 401">Workaround: Do not disable FA on the uplink trunk on the FA Proxy side.</p>
