NORTEL VPN GATEWAY (NVG)
Software Release 8.0.1.1

1. <u>Release Summary</u>

Release Date   : December 2009
Purpose   : Software maintenance release to address customer software issues

2. <u>Software Installation and upgrade notice</u>

SSL VPN Server Software
The SSL VPN server software is delivered in two different forms, as described below:

• SSL-8.0.1.1-upgrade_complete.pkg
Using this package is the preferred method for upgrading an existing SSL VPN cluster, as the upgrade is propagated across the cluster and all current configurations are preserved. The upgrade procedure is described in "Performing Minor/Major Release Upgrades" in Chapter 4 in the VPN Gateway User's Guide NN46120-104.
Note: TFTP cannot be used when upgrading to version 7.0.1 or later from an earlier version.

• SSL-8.0.1.1-boot.img
Using this image will reset the VPN Gateway to its factory default configuration. It must be used when a VPN Gateway with different software installed is to be added to a cluster, to bring the additional device to the same software version as in the cluster before joining it to the cluster. The software reinstall procedure is described in "Reinstalling the Software" in Chapter 3 in the VPN Gateway User's Guide NN46120-104.
Note: TFTP cannot be used when installing version 7.0.1 or later through the reinstall procedure.

Server Software Download
The server software is available for download from Nortel's Customer Support website. For more details, refer 8.0.1.0 release notes.

SSL VPN Client Software
Refer 8.0.1.0 release notes for download and installation details of SSL/IPSec VPN client & Secure Portable office.
