Providing Feedback to Us

We are always striving to improve our documentation and help you work better, so we want to hear from you! We welcome all feedback but especially want to know about:

- Content errors or confusing or conflicting information.
- Ideas for improvements to our documentation so you can find the information you need faster.

- Broken links or usability issues.

If you would like to provide feedback to the Extreme Networks Information Development team about this document, please contact us using our short [online feedback form](#). You can also email us directly at internalinfodev@extremenetworks.com.

Getting Help

If you require assistance, contact Extreme Networks using one of the following methods:

- **Global Technical Assistance Center (GTAC) for Immediate Support**
 - **Phone:** 1-800-872-8440 (toll-free in U.S. and Canada) or +1 408-579-2826. For the support phone number in your country, visit: www.extremenetworks.com/support/contact
 - **Email:** support@extremenetworks.com. To expedite your message, enter the product name or model number in the subject line.
- **GTAC Knowledge** — Get on-demand and tested resolutions from the GTAC Knowledgebase, or create a help case if you need more guidance.
- **The Hub** — A forum for Extreme customers to connect with one another, get questions answered, share ideas and feedback, and get problems solved. This community is monitored by Extreme Networks employees, but is not intended to replace specific guidance from GTAC.
- **Support Portal** — Manage cases, downloads, service contracts, product licensing, and training and certifications.

Before contacting Extreme Networks for technical support, have the following information ready:

- Your Extreme Networks service contract number and/or serial numbers for all involved Extreme Networks products
- A description of the failure
- A description of any action(s) already taken to resolve the problem
- A description of your network environment (such as layout, cable type, other relevant environmental information)
- Network load at the time of trouble (if known)
- The device history (for example, if you have returned the device before, or if this is a recurring problem)
- Any related Return Material Authorization (RMA) numbers

1 Release Notes for Risk Manager

V7.7.2.7

New Features

- **Enhancements to searching device rules by user or group**—Use the enhanced search functions to search device rules by user or group. Search Criteria fields are added to the Rule Search page to enhance your search experience when you search device rules by users and groups.
- **Search by users or groups in a topology path search**—You can refine your topology path search results by filtering on users and groups and view only the rules that impact your selected users or groups on the selected path.

System Requirements

For information about hardware and software compatibility, see the detailed system requirements in the [ExtremeSecurity Risk Manager Installation Guide](#).

Installing Risk Manager

For installation instructions, see the [ExtremeSecurity Risk Manager Installation Guide](#).

Fix list

There are no fixed APARs to report for Extreme Networks Security Risk Manager V7.7.2.7.

Known Issues

Issue description	Workaround
Juniper patch - FATAL: Could not load /lib/modules/2.6.32-431.29.2.el6.x86_64/modules.dep: No such file or directory.	When the patch finishes, restart the system to load the new kernel.
Historical correlation - event profile not showing all saved searches available.	Historical correlation does not show aggregated results.
Externally-sourced geodata.conf is not accurate enough and causing false/positives in the customer environment.	The location associated with the CIDR range is the country the IP is registered in, and not the country the IP is coming from.
