Abstract

This release notes document for ExtremeCloud IQ version 25.3.0.144 provides comprehensive details on enhancements, new features, addressed issues, and known limitations for network administrators managing the ExtremeCloud IQ platform. Key technical points include support for advanced device operating systems such as ExtremeXOS/Switch Engine (33.2) and VOSS/Fabric Engine (9.1.0.1), alongside IQ Engine versions 10.8.2 for improved network orchestration. Notable new features include LLDP configuration with multicast filters, enhanced ELRP settings for port management, and WPA3-SAE support with Protected Management Frames (PMF) for 6 GHz radios. The AP5020 now supports dynamic packet capture and dual 5 GHz/6 GHz radio modes, improving wireless performance diagnostics. Additionally, new VLAN attributes, real-time RF heat maps, and roaming trail visualization on the client map enhance network management. Addressed issues include performance fixes for AP5020 wired speed display, client session duplication, and syslog hostname configurations. Known issues highlight potential configuration push errors, Wi-Fi 6E support limitations, and unresolved firmware version discrepancies for certain devices. This release is designed for IT professionals and network engineers focused on optimizing and troubleshooting complex wireless deployments.

Help and Support

If you require assistance, contact Extreme Networks using one of the following methods:

Extreme Portal

Search the GTAC (Global Technical Assistance Center) knowledge base; manage support cases and service contracts; download software; and obtain product licensing, training, and certifications.

The Hub

A forum for Extreme Networks customers to connect with one another, answer questions, and share ideas and feedback. This community is monitored by Extreme Networks employees, but is not intended to replace specific guidance from GTAC.

Call GTAC

For immediate support: (800) 998 2408 (toll-free in U.S. and Canada) or 1 (408) 579 2800. For the support phone number in your country, visit www.extremenetworks.com/support/contact.

General Release Information

Table 2: VOSS Fabric Engine Support Matrix

XIQ Release 25r3	Version	Hardware Model	XIQ Onboard / Monitor / Config / Local Image Mgmt	Global Download Image
IQAgent Version	9.2.25			
Latest Supported GA Patch	9.2.0	—	✓	✓
Previous Supported GA Patch	9.1.1	—	✓	✓
Previous Supported GA Image	8.10.7	—	✓	✓

IQ Engine

- IQ Engine 10.8.2

New Hardware Support

No new hardware in this release.

Table 3: New Extreme Essentials Features in 25.3.0.2

Feature ID	Feature	Description
XESS-1842	Remove Facebook social login from Guest Essentials	Removed Facebook social login from ExtremeGuest Essentials.
XESS-1599	Rogue Alarm Detection and Reporting (New Algorithm)	New logic has been introduced to address false rogue detection with the Sync Sanctioned Rogue Alarm button on the Alarms page.

Table 4: New Features in 25.3.0.144

Feature ID	Feature	Description
XIQ-26446	AP5020 - Client mode support 2.4, 5G, 6G	ExtremeCloud IQ supports Client Mode on 2.4 GHz, 5 GHz, and 6 GHz for the AP5020.
XIQ-29745	AP5020 : Support for WPA3 Beacon Protection	Beacon Protection in Wi-Fi 7 is a mechanism that protects Wi-Fi beacon frames from being disrupted or interfered with. This feature is supported on the AP5020 and is configured on the SSID page.
XIQ-30107	AP5020: Support for Spectrum Analyzer 2.4G/5G	Spectrum Intelligence is supported on 2.4 GHz and 5 GHz radios on the AP5020. Note: BT power is required for Spectrum Intelligence on the AP5020.

Table 4: New Features in 25.3.0.144 (continued)

Feature ID	Feature	Description
XIQ-30109	Enhancement to Reduced Neighbor Report (RNR) - AP3K, AP5010, AP5050	Enhanced Reduced Neighbor Report (eRNR) is supported on the AP3000, AP3000X, AP5010, AP5050U, AP5050D. Go to Additional settings > Optional Settings > Other Options to Enable Enhanced RNR . When the 6GHz band is enabled on the main SSID page, Enable enhanced RNR is automatically selected. When the 6 GHz band is deselected, Enable enhanced RNR is automatically deselected.
XIQ-31302	Support for IQE 10.8r2	ExtremeCloud IQ supports IQ Engine 10.8.2.
XIQ-31424	Support for onboarding for CE2000 (medium UCP-based controller application) on the cloud	Introducing the ExtremeCloud IQ Controller Application CE2000 for medium to large campus wireless deployments. The ExtremeCloud IQ Controller Application is hosted on ExtremeCloud Edge Universal Compute Platform. It is a highly scalable and highly available enterprise wireless controller that can support up to 2,000 APs in standalone mode and 4,000 APs in HA pair. The ExtremeCloud IQ Controller Application hosted on ExtremeCloud Edge (Self Orchestration) 2130C, is the latest generation of this market-leading solution targeted to address various customer use cases. See the CE2000 Datasheet and the documentation site for more details.
XIQ-31425	Support for onboarding for CE3000 (large UCP-based controller) on the cloud	Introducing the ExtremeCloud IQ Controller Application CE3000 for large campus wireless deployments. The ExtremeCloud IQ Controller Application is hosted on ExtremeCloud Edge Universal Compute Platform. It is a highly scalable and highly available enterprise wireless controller that can support up to 10,000 APs in standalone mode and 20,000 APs in HA pair. The ExtremeCloud IQ Controller Application hosted on ExtremeCloud Edge (Self Orchestration) 3150C, is the latest generation of this market-leading solution targeted to address various customer use cases. See the CE3000 Datasheet and the documentation site for more details.
XIQ-34322	AP4020: Support for Spectrum Analyzer 2.4G/5G	The AP4020 supports Spectrum Intelligence on 2.4 GHz and 5 GHz radios.
XIQ-34325	AP4020 - Client mode support 2.4, 5G, 6G	ExtremeCloud IQ supports Client Mode on 2.4 GHz, 5 GHz, and 6 GHz for the AP4020.

Table 4: New Features in 25.3.0.144 (continued)

Feature ID	Feature	Description
XIQ-35357	Relocate PMF Settings to the Main SSID Page	Protected Management Frames (PMF) settings have moved from Additional Settings > Advanced Access Security Controls to the main SSID page. This change makes it easier to view and manage the PMF settings when adjusting SSID parameters that might affect them.
XIQ-35544	AP4020: Support for dynamic packet capture	The AP4020 supports Dynamic Packet Capture.
XIQ-35640	Change the user role assignment flow	The ExtremeCloud IQ user creation flow includes VIQ (Global) Scope versus Site scope selection. The Global Scope consists of all sites and the organization. This setting applies to all user roles, including the administrator role.
XIQ-36152	Hanshow ESL: AP5010 USBNET support	The Hanshow dongle is supported from USBNet on the AP5010.
XIQ-36772	AP4020 : Support for AKM 24 for WPA3-Personal (SAE)	Configure WPA-3 Personal (SAE) AKM 24 as an option for Wi-Fi 7 on the SSID page.
XIQ-38147	AP4020 : Support for WPA3 Beacon Protection	Beacon Protection in Wi-Fi 7 is a mechanism that protects Wi-Fi beacon frames from being disrupted or interfered with. This feature is supported on the AP4020 and is configured on the SSID page.
XIQ-39545	New Maps: Show Client Location	Wireless client locations are shown on Real-Time Maps.
XIQ-39609	FIPS Mode Icon	For StateRamp-enabled RDCs only, ExtremeCloud IQ displays a FIPS icon for APs with FIPS-Mode enabled. The AP4020 and AP5020 access points support StateRamp.
XIQ-40688	HotSpot 2.0 Configuration in IQE - AP4000	HotSpot 2.0 is now supported on the AP4000.
XIQ-40689	HotSpot 2.0 Configuration in IQE - AP4020 support	HotSpot 2.0 is now supported in the AP4020.
XIQ-40187	Actions Menu to Enable FIPS Mode	For StateRamp-enabled RDCs only, ExtremeCloud IQ accounts have an Actions menu item to enable or disable FIPS-Mode. The AP4020 and AP5020 access points support StateRamp.
XIQ-40189	FIPS-Enabled Filter	For StateRamp-enabled RDCs only, ExtremeCloud IQ includes a filter to display only APs with FIPS-Mode enabled— Device Function > Access Point (FIPS Enabled) . The AP4020 and AP5020 access points support StateRamp.

Addressed Issues in 25.3.0.144

Table 5: Addressed Issues in 25.3.0.144

Issue ID	Description
CFD-2874 (00215782)	Resolved an issue with KRACK vulnerabilities.
CFD-3185 (230008)	Resolved an issue where users were unable to migrate APs to NG VHM.
CFD-4389 (00282585)	Resolved an issue where ATOM devices had licensing discrepancies.
CFD-4620 (00295381)	Resolved an issue where applied EK was returning an unknown error.
CFD-8081 (02615516, 02627372)	Resolved an issue where tech data fails to download.
CFD-8467 (02653213)	Resolved an issue where unlinked A3 entries could not be removed from the ExtremeCloud IQ inventory.
CFD-11207 (02940567)	Resolved an issue where WiFix Channel and WiFix Power were not displaying configuration from Manage > Devices .
CFD-13445 (03067382)	Resolved an issue where client information could not be downloaded from Manage > Clients if the user names were in domain\username format.
CFD-13529 (03077071)	Resolved an issue when a user group on a subsequent page is selected, any user group selections made on previous pages were lost.
CFD-13546 (03074483)	Resolved an issue where Spectrum Intelligence scan on channels 100-140 Real-Time FFT, FFT Duty Cycle fields were empty.
CFD-13551 (02979477)	Resolved an issue where searching within Cloud Config Group configurations did not work properly.
CFD-13611 (03081429)	Resolved an issue where some SSIDs could not be cloned.
CFD-13645 (03077090)	Synced customer licenses to gemalto. IT activations reflect what is in ExtremeCloud IQ.
CFD-13674 (03081244, 03084990)	Resolved an issue where the Wi-Fi Statistics Report was not generating if the user accounts specified were MSP accounts.
CFD-13688 (03083372)	Reduced the character length of IP Firewall Policy names to 32 characters, maximum, as longer lengths were causing VIQ import functions to fail.

Table 5: Addressed Issues in 25.3.0.144 (continued)

Issue ID	Description
CFD-13697 (03084949)	Resolved an issue where user was able to connect to a PPSK SSID but the account did not exist in User Management.
CFD-13699 (03081367)	Resolved an issue where the Companion App was not enforcing location assignments for the Installer role.
CFD-13702 (03085479, 03088660)	Resolved an issue where importing a VIQ file resulted in an error regarding RmDashboardDeviceHealthAndUsageCapacity.
CFD-13710 (03085969, 03087801, 03094977)	Resolved an issue where the Organization name would not save when changed in Manage > Planning .
CFD-13739 (03087116)	Resolved an issue where changing the values of a floor plan to/ from feet/meters did not save in Manage > Planning .
CFD-13815 (03091422)	Resolved an issue where the SSID Used by column displayed inaccurate or sporadic data.
CFD-13850 (03090492)	Resolved an issue where importing a .csv file into an Auto-Provisioning rule failed.

Known Issues in 25.3.0.144

The following table lists known product issues. Issues are grouped according to ID prefix and sorted within their group with the most recently logged issue listed first. (Issue IDs are in descending order.)

Table 6: Known Issues in 25.3.0.144

Issue ID	Description
EXOS-37458	When using ExtremeCloud IQ to configure a single port in a VLAN as an LLDP voice port with Med Capabilities and policies and then changing the port type to access or trunk , the LLDP configuration for Med Capabilities appears on ExtremeXOS/Switch Engine devices running EXOS 33.2.
XCP-8418	Follow-up to fix ATOM license logic.
XIQ-39282	After successfully onboarding locally managed APs, a misleading Device Update Failed message might appear in the Last Updated field. This is only a display issue and does not affect any functionality.
XIQ-34912	Clients discovered through node alias or DHCP snooping fingerprint might not immediately appear in the Device 360 Clients table. It can take up to 10 minutes for the new entries to appear in the Device 360 Clients table.
XIQ-34908	When using a stack template with a Link Aggregation Group (LAG), if the LAG has ports from different slots, you must enable Instant Port Profile/Instant Secure Port from the LAG on the template view that contains the master port. This requirement applies to a preexisting Link Aggregation Group in the template, or when creating a new Link Aggregation Group.
XIQ-34846	On wired VOSS and Fabric Engine devices for Cisco Discovery Protocol (CDP), configuration pushed via ExtremeCloud IQ still requires enabling LLDP TX/RX status through device CLI, for a CDP neighbor to establish.
XIQ-34724	Delta configuration push fails for Wifi0 with dual 5G mode when 5G-Low channels are not supported.
XIQ-33709	Some IP VLAN pairs from the Client 360 table and Client pages might be missing if they have multiple IPs learned through Node Alias events.
XIQ-33498	AP5050 AFC 6GHz FCC does not support client mode.

Table 6: Known Issues in 25.3.0.144 (continued)

Issue ID	Description
XIQ-33103	The AFC View on the Manage Device page displays <i>qualified</i> AFC-governed 6 GHz access points. This feature requires version 10.7.2 or higher. The AFC View does not include onboarded devices with a firmware version earlier than the minimum required version. After upgrading to the minimum required version, the AFC View displays the qualified access points.
XIQ-32459	The ExtremeCloud IQ deployment API HTTP Success status code changed from 200 to 202.
XIQ-31639	The IoT heat map is always shown, regardless of whether an IoT profile is configured on the AP. There is no status for IoT radios in the API.
XIQ-31601	A perimeter added or modified from the Planning page does not sync with the Realtime maps page.
XIQ-31433	The Cloud Service component of iBeacon is temporarily disabled. This service will be available in a future release.
XIQ-26907	A delta configuration push error might occur when configuring the port Forwarding Rule for Client Mode. Workaround: Push a complete configuration update.
XIQ-21339	ExtremeCloud IQ does not display the error when aggregation is enabled with a rate-limit configuration.
XIQ-20909	When configuring 6GHz radio for a country that does not support it, the configuration push to the AP3000 fails. Workaround: Revert to 2.4 GHz.
XIQ-19977	The MCast rate configured in an AP template does not take effect when sCLI is presented.
XIQ-19509	Access points go offline when pushed to minimum speed and half duplex transmission mode for eth0, and then they reboot. After the reboot, the configuration reverts back to minimum speed with full duplex.
XIQ-19498	When the AP5010 eth0 interface is operating with maximum speed, changing the transmission type causes ExtremeCloud IQ to also generate a delta CLI for speed.
XIQ-19379	When you initiate a "release to the cloud" from the controller, for an AP3000 that was onboarded as locally managed, the system deletes the AP from ExtremeCloud IQ Controller but not from ExtremeCloud IQ.
XIQ-19368	The user interface overrides Supplemental CLI. If you add an sCLI object and there is a code conflict with the GUI, the GUI has priority. To give the sCLI priority, place the sCLI code at the bottom of the command structure in the audit.
XIQ-19320	The Wi-Fi Interface Transmission power does not update in the Managed Device page after a bulk edit.

Table 6: Known Issues in 25.3.0.144 (continued)

Issue ID	Description
XIQ-12503	Network 360 shows Unknown Error when All Access Points Applications is selected and the user selects both ExtremeWireless WiNG and IQ Engine devices. Workaround: Clear selected ExtremeWireless WiNG devices.
XIQ-5700	Client Trial showed only the currently connected AP when the client roamed to a different AP from the onboarded ExtremeCloud IQ Controller.
CFD-12971 (03040726)	Capwap disconnection for about 1.5 hours due to the capwap server i/o timeout issue.
CFD-13877 (03094673)	Wi-Fi Interface graph does not match Device > Monitoring > Wireless Interface .
CFD-11529 (02957942)	API response data is unclear.
CFD-10699 (02906999)	Universal Access Points failed to complete the WiNG-OS conversion, even after a successful CAPWAP and STUN binding.
CFD-8946 (02710778, 02748750)	License descriptions are automatically cleared when the Activated status is updated.
CFD-7360 (02498292)	For Wing-AP sites, contrary to present implementation, customers expect to see APs offline when ExtremeCloud IQ / nsight policy is not used for that site.
APC-41057	Legend labels on the SR2200/2300 switch stack graph sometimes disappear when attempting to download or print the graph. Workaround: Download one graph at a time, and open the downloaded file before choosing to download again. Note: The SVG option is the most stable format; PNG, JPG, and PDF have spacing issues on the legend section.
APC-21456	In rare cases, ExtremeCloud IQ does not upload some IGMP sub-commands successfully. Note: SR2200/2300 only. Workaround: Use the Supplemental CLI to upload commands when necessary. To use the supplemental CLI tool, go to Global Settings > VIQ Management , and set the Supplemental CLI slider to ON .
