Abstract

This release notes document for ExtremeCloud SD-WAN v26.3.0 describes the features, improvements, release information, and support guidance for ExtremeCloud SD-WAN version 26.3.0. The release is a maintenance update focused on user interface refinement rather than major architectural or functional enhancements. The primary change introduced under feature ID SWAN-272 renames the SD-WAN landing page from **SD-WAN** to **WAN Configuration Classic**, providing clearer navigation and terminology within the management interface while preserving existing functionality and workflows. The document includes current release identification, summarizes the change implemented in this version, and provides global support resources for troubleshooting and assistance. No new deployment models, security mechanisms, performance optimizations, automation enhancements, interoperability updates, configuration procedures, defect resolutions, or known limitations are documented in this release. The content is intended for network administrators, SD-WAN operators, and technical support personnel responsible for managing and maintaining ExtremeCloud SD-WAN environments and serves as a concise technical reference for understanding the changes introduced in release 26.3.0.

General Release Information

Current Release: 26.3.0

New Features in ExtremeCloud SD-WAN 26.3.0

New features in release 26.3.0

Feature ID	Feature	Description
SWAN-272	WAN Configuration Classic	The SD-WAN landing page previously labeled **SD-WAN** is now displayed as **WAN Configuration Classic.**
