Abstract

This Feature Matrix document for Fabric Engine and VOSS version 9.4 provides a comprehensive overview of the supported features across various ExtremeSwitching and Virtual Services Platform (VSP) product families. It details the introduction of specific functionalities, feature compatibility, and support conditions for different hardware models. The document is structured alphabetically by feature and includes information on which software release first introduced support for each feature. It also highlights exceptions, restrictions, and hardware capabilities related to the implementation of these features. The matrix serves as a reference to determine feature availability on specific products.

- Where you can find additional information and help.
- How to reach us with questions and comments.

Purpose

This document provides information on features in Extreme Networks Fabric Engine™ and VSP Operating System Software (VOSS).

This release of Fabric Engine runs on the following product families:

- ExtremeSwitching 4220 Series
- ExtremeSwitching 5320 Series
- ExtremeSwitching 5420 Series
- ExtremeSwitching 5520 Series
- ExtremeSwitching 5720 Series
- ExtremeSwitching 7520 Series
- ExtremeSwitching 7720 Series
- ExtremeSwitching 7830 Series

Note

Prior to Fabric Engine 8.6, 5520 Series and 5420 Series platforms ran VOSS. VOSS support ends for these platforms with VOSS 8.5.x. Unless otherwise noted, feature support introduced in earlier VOSS releases is also available in Fabric Engine releases.

This release of VOSS runs on the following product families:

- ExtremeSwitching VSP 4900 Series
- ExtremeSwitching VSP 7400 Series

How to Use This Document

This document identifies the release that first introduced feature support on a hardware product. Each new release includes all the features from previous releases unless specifically stated otherwise. Use this document to determine if features are supported on your product.

Note

Different models within a product family can be introduced in different software releases. The tables in this document include the earliest release number. To understand which release is the minimum software release for each model, see the Network Operating System (NOS) Release Notes.

This document arranges the features alphabetically, based on how those features are included in the NOS User Guide. The tables in this document also appear in the conceptual feature content of the NOS User Guide.

The Release introduced column in the tables provides the following information:

- If the feature is supported, it indicates the Release the feature support was introduced.
- It indicates support exceptions within a product family. For example, if only 1 of 14 models does not support the feature, meaning the other 13 models do support the feature.
- It indicates if any of the models support the feature but with restrictions or conditions. For example, specific models only support the feature on specific ports.

This document distinguishes between hardware that is not capable of supporting a feature (Not Applicable) and hardware that is capable of supporting a feature but does not (Not Supported).

Documentation and Training

Find Extreme Networks product information at the following locations:

Open Source Declarations

Some software files have been licensed under certain open source licenses. Information is available on the [Open Source Declaration](#) page.

Training

Extreme Networks offers product training courses, both online and in person, as well as specialized certifications. For details, visit the [Extreme Networks Training](#) page.

Help and Support

If you require assistance, contact Extreme Networks using one of the following methods:

Extreme Portal

Search the GTAC (Global Technical Assistance Center) knowledge base; manage support cases and service contracts; download software; and obtain product licensing, training, and certifications.

The Hub

A forum for Extreme Networks customers to connect with one another, answer questions, and share ideas and feedback. This community is monitored by Extreme Networks employees, but is not intended to replace specific guidance from GTAC.

Call GTAC

For immediate support: (800) 998 2408 (toll-free in U.S. and Canada) or 1 (408) 579 2800. For the support phone number in your country, visit www.extremenetworks.com/support/contact.

Before contacting Extreme Networks for technical support, have the following information ready:

- Your Extreme Networks service contract number, or serial numbers for all involved Extreme Networks products
- A description of the failure
- A description of any actions already taken to resolve the problem
- A description of your network environment (such as layout, cable type, other relevant environmental information)
- Network load at the time of trouble (if known)
- The device history (for example, if you have returned the device before, or if this is a recurring problem)
- Any related RMA (Return Material Authorization) numbers

Subscribe to Product Announcements

You can subscribe to email notifications for product and software release announcements, Field Notices, and Vulnerability Notices.

1. Go to [The Hub](#).
2. In the list of categories, expand the **Product Announcements** list.
3. Select a product for which you would like to receive notifications.
4. Select **Subscribe**.
5. To select additional products, return to the **Product Announcements** list and repeat steps 3 and 4.

You can modify your product selections or unsubscribe at any time.

Send Feedback

The User Enablement team at Extreme Networks has made every effort to ensure that this document is accurate, complete, and easy to use. We strive to improve our documentation to help you in your work, so we want to hear from you. We welcome all feedback, but we especially want to know about:

- Content errors, or confusing or conflicting information.
- Improvements that would help you find relevant information.
- Broken links or usability issues.

To send feedback, email us at Product-Documentation@extremenetworks.com.

Provide as much detail as possible including the publication title, topic heading, and page number (if applicable), along with your comments and suggestions for improvement.
