## Abstract

This release notes for ExtremeCloud™ SD-WAN version 25.5.0 outlines resolved issues and operational improvements for enterprise SD-WAN environments. The release introduces no new features but addresses critical configuration and bandwidth management defects. Fixes include enabling access bandwidth configuration below 1 Mbps and correcting the maximum session bandwidth range to ensure accurate traffic shaping and resource allocation. The document is intended for advanced technical users responsible for SD-WAN deployment, configuration, and performance optimization, providing guidance on identifying resolved issues and maintaining system stability across distributed networks.

# General Release Information

Current Release: 25.5.0

---

## New Features in ExtremeCloud SD-WAN 25.5.0

There are no new features in this ExtremeCloud SD-WAN 25.5.0 release.

## Addressed Issues in ExtremeCloud SD-WAN 25.5.0

Issue ID	Description
CFD-15114	The system did not allow configuring access bandwidth below 1 Mbps.
XCW-8622	QoS Profile settings enforce a limit where maximum session bandwidth cannot be configured beyond 500 times the objective bandwidth.
