

BaySecure FireWall-1

Integrating the highest-performing routers with the market leading firewall.

Thank you for purchasing BaySecure FireWall-1!

Bay Networks® BaySecure FireWall-1 integrates the Check Point Technologies Ltd. FireWall-1 stateful inspection technology into BayRS™. You configure and manage firewalls on Bay Networks routers using the Check Point award-winning graphical user interface (GUI). Through the integration of Check Point FireWall-1 technology into BayRS, Bay Networks routers provide the highest level of network access control available.

Product Components

	New FireWall-1 Software Kit	FireWall-1 License Upgrade	FireWall-1 Agent License
From Check Point: <ul style="list-style-type: none">FireWall-1 CD-ROM, with a license serial number affixed to the package*:<ul style="list-style-type: none">Version 3.0a interoperates with BayRS 11.03, 12.10, or 12.01Version 3.0b interoperates with BayRS version 12.20	✓	✓	
<ul style="list-style-type: none">FireWall-1 documentation set	✓		
From Bay Networks: BaySecure FireWall-1 documentation**	✓		✓

* Follow the directions in the CD-ROM package to exchange the license serial number for a license key. Use the software on the CD only if you are installing the FireWall-1 management software for the first time. Otherwise, the CD is extraneous. The diskette in the CD-ROM package is extraneous.

**BaySecure FireWall-1 documentation is available on the Bay Networks documentation CD accompanying your router release or via the Bay Networks Worldwide Web site at <http://www.baynetworks.com>.

Getting Started

Begin by reading *Configuring BaySecure FireWall-1*, which describes the steps necessary to get a firewall running on the router. This book will refer you to the Check Point documents where appropriate.
