7. Changes in This Release

New Features

None.

Old Features Removed

None.

Problems Resolved

In previous code versions it was not possible to add QoS filters for virus protection through the Web
interface (**Q00900780**).

Rev: 1.1 (02-Nov-2004)

On a hybrid stack, all the MAC addresses were not always properly displayed when using the CLI **(Q00915551)**.

802.1p priority settings were incorrectly mapped to the BPS2000 dual-GIG MDA's 8 egress hardware queues **(Q00991174).**

802.1P priority settings were incorrectly mapped to the stacking module's 2 egress hardware queues **(Q01004739)**.

8. Known Limitations

None.

For other known issues, please refer to version 3.0.0 release notes from the Nortel Networks web site at: ***http://www.nortelnetworks.com/support***
