Software Version 2.1.6.4

6. Compatibility

This software release is managed with Java Device Manager (JDM) release 5.7.0.0

7. Changes in This Release

New Features in This Release

None

Old Features Removed From This Release

None

8. Problems Resolved in This Release

1. Description: ERS1424 unable to upload config and history log Files.

Root Cause: The system needs to allocate a significant block of memory to store tftp information when transferring configuration and history files.. In the case where the device ip is set as tftp server ip and the transfer fails via JDM, the system was not freeing the allocated memory.

Solution: When tftp download/upload transfer fails, to the system will now free the memory allocated for the transfer.

9. Outstanding Issues

None.

10. Known Limitations

For known issues, please refer to version 1.2 release notes on the Nortel Networks Web site at: <http://www.nortel.com/support>.
