None.

## **Problems Resolved in This Release**

ERS454800-2835, ERS454800-2836 - ERS4800s running 5.11.x code can't process untagged management I-SID traffic packets if it is received encapsulated by a VOSS 9K or ERS8600.

### **8. Outstanding Issues**

None.

### **9. Known Limitations**

None.

### **10. Documentation Corrections**

For other known issues, please refer to the product release notes and technical documentation available from the Avaya Technical Support web site at: <http://www.avaya.com/support> .

### **11. Troubleshooting**

As good practices of help for troubleshooting various issues, AVAYA recommends:

- configuring the device to use the Simple Network Time Protocol to synchronize the device clock;
- setting a remote logging server to capture all level logs, including informational ones. (#logging remote level informational).
