All other trademarks and registered trademarks are the property of their respective owners.

### Statement of Conditions

In the interest of improving internal design, operational function, and/or reliability, Nortel Networks NA Inc. reserves the right to make changes to the products described in this document without notice.

Nortel Networks NA Inc. does not assume any liability that may occur due to the use or application of the product(s) or circuit layout(s) described herein.

---

## Introduction

This release note describes information that was not included in the *Reference for the BayStack 350/410/450 Management Software Switching Operations* (Bay Networks part number 304935-A).

## Known Issues of Device Manager

The following are known issues that you may encounter when using the Device Manager version 2.0.3 software.

### BayStack 450 Agent Support

Device Manager version 2.0.3 only supports the BayStack 450 version 1.3 agent.

## Online Help

To access a Device Manager online Help topic, select the Help toolbar button or click the Help button located in each dialog box. To access subsequent help topics, exit the web browser before clicking a Help button.

## Viewing Port History

If you experience problems viewing RMON history for a port when you select the RMON History tab, use the following procedure:

1. **Select a port.**
2. **Click the Graph toolbar button.**

The graph port window opens displaying the Interface tab.

3. **Click the RMON History tab.**

The RMON History tab is displayed. Device Manager does not indicate port statistics.

4. **Click the RMON EtherStat tab.**

The RMON EtherStat tab is displayed.

5. **Click the RMON History tab again.**

You can now view the port statistics.

## **Known Issues of BayStack 450 Version 1.3 Agent**

The following are known issues that you may encounter when using the BayStack 450 version 1.3 agent.

### **Multi-Link Trunks**

If you configure a distributed multi-link trunk through a switch stack, you can view the Spanning Tree port information only when you select the first trunk port. You cannot view this information when you access any other trunk ports.

### **Media Dependent Adapters**

The LEDs on the BayStack™ 450-1SR and BayStack 450-1LR MDAs incorrectly indicate the status of Link, Phy Select, and Activity.
