Extreme Management Center

Release Recommendation

Published: February 2022

Part Number: 9036486-06

Release Recommendation

We recommend a transition from Extreme Management Center to the new ExtremeCloud IQ – Site Engine version 21.11.10.57. Contact the local Extreme Networks representative to transition licenses. Typically, there is no additional cost for the transition.

When installing or upgrading your version of Extreme Management Center, we recommend using the latest release, Extreme Management Center version 8.5.6.17. This release includes the latest new features and enhancements, a significant list of fixed bugs, and various usability improvements.

Version 8.5.6.17 of Extreme Management Center includes the following image files:

- ExtremeManagementCenter_Suite_8.5.6.17
- 8.5.6.17 Analytics
- 8.5.6.17 Control
- 8.5.6.17 Fabric Mgr
- 8.5.6.17 Management
- 8.5.6.17 Guest & IoT Manager

Download the files that are applicable to your Extreme Management Center installation. Use the installation instructions to install or upgrade your version of Extreme Management Center.
