

1. Release Summary

Release Date: 22nd February 2010

Purpose: The Network Resource Manager 2.1.0.1 Release Notes provide the following information:

- Release 2.1.0.1 install requirement
- Device support changes in Release 2.1.0.1
- Issues fixed in Release 2.1.0.1

2. Install Requirement

Release 2.1.0.1 is a patch release to be applied on top of an existing NRM install. The installer does not install complete NRM but allows update to existing NRM functionality. Please ensure that you have NRM 2.1 installed prior to installing NRM 2.1.0.1 release.

3. Updated device support in NRM Release 2.1.0.1

Release 2.1.0.1 augments the device support of NRM 2.1 release. The new device versions that are now supported (in addition to NRM 2.1 support) are:

- ERS 8600 v7.0
- ERS 5500/5600 v6.1
- ERS 4500 v5.3
- Secure Router v10.2
- ES 460/470 v3.7.x

4. Issues fixed in NRM Release 2.1.0.1

The following bugs were fixed in NRM Release 2.1.0.1

Q02078529: NRM2.1-Backup of config for 4500 stack fails
Q02055329: NRM 2.1: Failed to upgrade ERS5510
Q02055706: NRM-2.1-displays error when upgrading Secure Routers
Q02092380: 8300 fails to backup config
Q02099361: NRM2.1-unable to upgrade 5500 to 6.0.4 code
Q02099378: NRM 2.1-faulty error message for config backup over T1 line
Q02066440: NRM/Trying to upgrade software version V6.1
Display issue with more than 50 lines of credentials
Issue with database backup and restore to a different disk or directory
