REVISION NOTES FOR SITE MANAGER VERSION 14.00 REVISION 1D11

Site Manager Version 14.00 Revision 1D11 is a post 14.00 revision. This version is backwards compatible and supports the following BayRS (router software) versions:

- 14.00, 14.00 Revisions 1, 1C, 1D5, 1D9, and 1D11
- 13.00, 13.01, 13.02, 13.03, 13.04, 13.10, and 13.20
- 12.00, 12.01, 12.02, 12.03, 12.04, and 12.05

Note: When running revisions of BayRS in conjunction with a fix version of Site Manager, be aware that there may be new MIB attributes that were added in a router revision that are not supported in a Site Manager revision. Refer to the Revision Notes for both Site Manager and BayRS software.

Site Manager 14.00 Revision 1D11 is Year 2000 Compliance Certified by Nortel Networks. It has successfully passed the Nortel Networks test procedure which tests conformance to the Nortel Networks Year 2000 definitions.

==
Site Manager Version 14.00 Revision 1D11 corrects the following problems:
==

CR 136822-1: IP
An IP traffic filter with 20 source IP address ranges, one destination range, and two port ranges fragments and never becomes active.

CR 139097-1: CSMA/CD
After upgrading from any pre-13.20 version of BayRS to BayRS 14.00, if you click on "edit line" on a DE100 interface, the 100BASE-T interface is brought down and then back up.
