This document is protected by copyright and distributed under licenses restricting its use, copying, distribution, and decompilation. No part of this document may be reproduced in any form by any means without prior written authorization of Nortel Networks, Inc. Documentation is provided “as is” without warranty of any kind, either express or implied, including any kind of implied or express warranty of non-infringement or the implied warranties of merchantability or fitness for a particular purpose.

U.S. Government End Users: This document is provided with a “commercial item” as defined by FAR 2.101 (Oct 1995) and contains “commercial technical data” and “commercial software documentation” as those terms are used in FAR 12.211-12.212 (Oct 1995). Government End Users are authorized to use this documentation only in accordance with those rights and restrictions set forth herein, consistent with FAR 12.211- 12.212 (Oct 1995), DFARS 227.7202 (JUN 1995) and DFARS 252.227-7015 (Nov 1995).

Nortel Networks, Inc. reserves the right to change any products described herein at any time, and without notice. Nortel Networks, Inc. assumes no responsibility or liability arising from the use of products described herein, except as expressly agreed to in writing by Nortel Networks, Inc. The use and purchase of this product does not convey a license under any patent rights, trademark rights, or any other intellectual property rights of Nortel Networks, Inc.

Alteon Firewall 5100 Series, 5008, 5010, 5012, 5100, 5300, 5400, 5500, 5600, 5700, 5105, 5109, 5112, 5114, 5308, 5408, 5610, 5710, Alteon iSD-SFD, Alteon Firewall, Firewall OS, Alteon SFA, Alteon Firewall Accelerator, and Alteon Accelerator OS are trademarks of Nortel Networks, Inc. in the United States and certain other countries.

Check Point, OPSEC, and SmartUpdate are trademarks of Check Point Software Technologies Ltd. FireWall-1 and VPN-1 are registered trademarks of Check Point Software Technologies Ltd.

Any other trademarks appearing in this manual are owned by their respective companies.

Release Notes

These release notes provide the latest information regarding the Alteon Firewall 5100 Series (models ASF 5105, ASF 5109, ASF 5112, and ASF 5114) for Release 2.2.3. This supplement modifies information found in the complete documentation. Please keep this information with your Nortel Networks product manuals.

Late-Breaking News and Support

Before you put your system into commission, please check the Nortel Networks Customer Support Web site for the latest software and documentation on the Alteon Firewall. Be sure to review the readme.txt file collocated with the software, which has the list of open Change Requests (CRs) and closed CRs for this release. To access the Web site:

- Point your browser to: <http://www.nortelnetworks.com/cs>.
- Enter the registered user name and password previously assigned to you by Nortel Networks Customer Support.
If you are not a registered user at Nortel Networks, please click on the **Register** button on the left-hand column of the Nortel Networks Customer Support Web site, and follow the 5-step registration process.
- Once you have signed in, go to the Software page for the Alteon Firewall by selecting:
Alteon ▶ Alteon Switched Firewall System (Software).
- Click on “Software Type” in the list header to sort the Software page by type. Alteon Firewall software is type “AF.”
- Follow the “[Software Download Procedure](#)” on [page 9](#) to download the present software release, patch release software (if it exists), and readme.txt file.

NOTE – The Nortel Networks Customer Support Web site also provides access to Nortel Networks customer support for accounts under warranty or accounts that are covered by a maintenance contract.

Documentation

These *Release Notes* (Part No. 213456-H) are posted along with the *Alteon Firewall 5100 Series Installation and User's Guide* (Part No. 213455-G) at the Nortel Customer Support Web site. Navigate to the site according to the instructions under “[Late-Breaking News and Support](#)” on page 3, log in, and select:

Alteon ▶ Alteon Switched Firewall System (Documentation)

Then select the document you are interested in and open it. You must have Adobe Acrobat Reader running on your system to open the guide in your browser. (Adobe Acrobat Reader is available for free at <http://www.adobe.com>.) Once you have opened the document in your browser, you can save it to your system by pressing the micro floppy disk icon on the Acrobat Reader menu bar (below your browser tool bars).

CheckPoint Product Name Changes

For FP-3 and later feature packs, Check Point changed the names of some of their products that are referenced in the Alteon Firewall 5100 system. These names have been changed, where applicable, in the *Alteon Firewall 5100 Series Installation and User's Guide*, the Command Line Interface (CLI) and the Browser-Based Interface (BBI). A table of name changes is provided here:

Table 1 Check Point Product Name Changes for FP-3 and later releases

Current Name	Name Prior to NG FP-3
SmartDashboard	Policy Editor
SmartView Tracker	Log Manager or Log Viewer
SmartView Status	Status Manager or System Status
SmartView Monitor	Real-Time Monitor or Traffic Monitor
Smart Center Server	Management Server
SMART Clients	Management Clients
SmartUpdate (see note below)	SecureUpdate

NOTE – SmartUpdate/SecureUpdate is not supported by the Alteon Firewall for installing patches. You must use the Alteon Firewall software releases.

New Features for Release 2.2.3

CheckPoint has released FireWall-1 NG *Application Intelligence (R54)*, a feature pack upgrade that succeeds FireWall-1 NG FP-3. Alteon Firewall Release 2.2.3 supports the Application Intelligence feature pack.

NOTE – Release 2.2.3 does not support FP-3. The latest version of the Alteon Firewall 5100 Series software that supports FP-3 is Release 2.2.1.

Application Intelligence has functions that allow the CheckPoint FireWall-1 NG system to detect intrusions at the application layer. For more information, go to <http://www.checkpoint.com> and view CheckPoint's Application Intelligence literature.

Active-Active

Support for active-active configurations on Alteon Firewall Clusters has been added to Release 2.2.3. A second IP address for each interface was needed to support a second virtual router IP address on each active-active interface. This was implemented at the CLI by replacing

```

/cfg/net/if #/addr <IP address>
with
/cfg/net/if #/addr1 <IP address>
and
/cfg/net/if #/addr2 <IP address>

```

To enable active-active processing, `/cfg/net/vrrp/aa y|n` was added.

You can perform the same functions at the BBI, by entering the port addresses on the Network ▶ Interfaces (Add/Modify) form and enabling active-active on the Network ▶ VRRP form.

Proxy ARP

The Proxy ARP menu is now accessed by entering `/cfg/net/adv/parp`. The Proxy ARP menu options did not change. For information on the Proxy ARP configuration status, you now enter `/info/net/parp`.

Using the BBI, you can configure Proxy ARP on the Network ▶ Routes ▶ Proxy ARP form.

These commands and a configuration example for an active-active network are documented in the *Alteon Firewall 5100 Series 2.2.3 Installation and User's Guide*.

Clarifications

Check Point High Availability and VRRP

Check Point High Availability (CPHA) and Alteon Firewall VRRP are separate implementations of the same feature. CPHA requires a license. Alteon Firewall VRRP does not.

To run Alteon Firewall VRRP, it is not necessary to configure CPHA on the Check Point Management station. To run CPHA, an Alteon Firewall VRRP configuration is required.

OpenSSL

This release includes OpenSSL 0.9.6.g with buffer overflow patches.

Upgrading Software

The Alteon Firewall provides a variety of ways to upgrade your software. Before you begin downloading software, consider the following information.

Alteon Firewall Upgrade Matrix

- Upgrading Release 1.x to Release 2.x using an ftp/tftp server is not supported on any platform (see [“Upgrading from Release 1.1.2 or 1.1.3”](#) on page 7 for an upgrade workaround).
- Upgrading Release 2.1.x is supported on all platforms.

Alteon Firewall Software Upgrade/Reinstall Options

There are three image versions of Alteon Firewall software; .iso, .img, and .pkg:

- The .iso image is for creating the Alteon Firewall software CD. You must download the .iso image to a server that your CD-ROM burner has access to.
- Both the .img image and the .pkg image are installed from an ftp or tftp server using the /boot/software/download command. The .img image overwrites the current software version, while the .pkg image installs it in parallel with the existing version. You can activate .pkg image at your convenience using the /boot/software/activate command.

NOTE – For .iso and .img installations, all configuration parameters, logs, etc. are lost. Be sure to save your configuration to an ftp or tftp server using the `/cfg/ptcfg` command and restore it after reinstallation using the `/cfg/gtcfg` command.

NOTE – For complete installation instructions, see the readme.txt file that is collocated with the software (see “Software Download Procedure” on page 9 for Web-site navigation instructions).

Upgrading from Release 1.1.2 or 1.1.3

You must install an .iso image from a CD-ROM to upgrade from 1.x to 2.x. Follow the instructions below to download and install the image

Downloading Release 2.2.3

1. Point your browser to Alteon Switched Firewall System Downloads page (see “Software Download Procedure” on page 9 for instructions).
2. Select the Alteon Firewall 2.2.x image file (.iso).
3. Copy the file to your ftp/tftp server.

Installing Release 2.2.3

NOTE – Be sure to save your configuration to your ftp/tftp server before installing Release 2.2.3 (see the Firewall CLI commands `/cfg/ptcfg` and `/cfg/gtcfg`). Configuration parameters are lost when you install an ISO image.

1. Put a blank CD in your CD-ROM burner, select the “File/Burn Image” option (or equivalent), and burn the Release 2.2.x image onto the blank CD.
2. Install the CD in the Alteon Firewall CD-ROM drive.
3. Reboot the Alteon Firewall.
4. Login as root (no password is necessary).
5. Issue the command: `install-asf <model #>` (asf5105 or asf5109 or asf5112 or asf5114, whichever matches your model #).

Wait for the installation script to finish. If the Alteon Firewall does not reboot automatically, take the software CD out and reboot the system manually.

- 6. Login as admin. The installation is complete.**
- 7. Restore the configuration from the ftp/tftp server using the `/cfg/gtcfg` command.**

This is required to apply the restored configuration.

Software Download Procedure

Downloading Alteon Firewall software includes a lengthy Web navigation process. Step 1 starts at the Nortel Networks Customer Support Web site (www.nortelnetworks.com/cs). Each associated Action takes you to the next Step/Web Page or Dialog Box in the procedure.

Note: You must have a username and password assigned by Check Point for Step 5 and beyond. If you do not, follow the links in the note on that Web page (Software Subscription Download Section) to obtain them.

Step	Web Page or Dialog Box	Action
1	Nortel Networks Customer Support	Select Alteon
2	Products By Product Family	Select Alteon Switched Firewall System (Software)
3	Alteon Switched Firewall Software	Sort By Type AF (Alteon Firewall) Select title of latest AF release
4	Software Detail Information	Select www.Checkpoint.com
5	Software Subscription Download Section	Enter username and password assigned by Check Point
6	Software Subscription Download Agreement	Select Accept
7	Downloads	Select product from drop-down box: Nortel Alteon Switched Firewall Then select Go
8	Downloads Nortel Alteon Switched Firewall	Select version from drop-down box: NG for Alteon Firewall (5100 series) Then select Go
9	Downloads Nortel Alteon Switched Firewall NG for Alteon Firewall (5100 series)	Select levels from the three drop-down boxes: Operating System: Nortel OS Encryption: Any SP Patch Level: Application Intelligence - ASF 2.x.x.x Then select Go
10	Downloads Nortel Alteon Switched Firewall NG for Alteon Firewall (5100 series) (Nortel OS Any Application Intelligence - ASF 2.x.x.x)	Select Download Option(s) CD Image (.iso) for burning a CD image Boot Image (.img) for reinstall via ftp/tftp Upgrade (.pkg) for upgrade via ftp/tftp
11	File Download Dialog Box	Select Save
12	Save As Dialog Box	Enter directory path, then select Save
13	For Check Point Release Notes, go to http://www.checkpoint.com/techsupport/installation/ng/release_notes.html For Check Point User Documentation, go to http://www.checkpoint.com/support/technical/documents/index.html
