

Avaya VPN Client Release Notes – VPN Client Software Release 10.04.016

Avaya VPN Client Release 10.04.016

Document Status: **Standard**

Document Number: **NN46110-411**

Document Version: **03.01**

Date: **December 2010**

Notices

While reasonable efforts have been made to ensure that the information in this document is complete and accurate at the time of printing, Avaya assumes no liability for any errors. Avaya reserves the right to make changes and corrections to the information in this document without the obligation to notify any person or organization of such changes.

Documentation disclaimer

Avaya shall not be responsible for any modifications, additions, or deletions to the original published version of this documentation unless such modifications, additions, or deletions were performed by Avaya. End User agree to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation, to the extent made by End User.

Link disclaimer

Avaya is not responsible for the contents or reliability of any linked Web sites referenced within this site or documentation(s) provided by Avaya. Avaya is not responsible for the accuracy of any information, statement or content provided on these sites and does not necessarily endorse the products, services, or information described or offered within them. Avaya does not guarantee that these links will work all the time and has no control over the availability of the linked pages.

Warranty

Avaya provides a limited warranty on this product. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya's standard warranty language, as well as information regarding support for this product, while under warranty, is available to Avaya customers and other parties through the Avaya Support Web site: <http://www.avaya.com/support>

Please note that if you acquired the product from an authorized reseller, the warranty is provided to you by said reseller and not by Avaya.

Licenses

THE SOFTWARE LICENSE TERMS AVAILABLE ON THE AVAYA WEBSITE, <HTTP://SUPPORT.AVAYA.COM/LICENSEINFO/> ARE APPLICABLE TO ANYONE WHO DOWNLOADS, USES AND/OR INSTALLS AVAYA SOFTWARE, PURCHASED FROM AVAYA INC., ANY AVAYA AFFILIATE, OR AN AUTHORIZED AVAYA RESELLER (AS APPLICABLE) UNDER A COMMERCIAL AGREEMENT WITH AVAYA OR AN AUTHORIZED AVAYA RESELLER. UNLESS OTHERWISE AGREED TO BY AVAYA IN WRITING, AVAYA DOES NOT EXTEND THIS LICENSE IF THE SOFTWARE WAS OBTAINED FROM ANYONE OTHER THAN AVAYA, AN AVAYA AFFILIATE OR AN AVAYA AUTHORIZED RESELLER, AND AVAYA RESERVES THE RIGHT TO TAKE LEGAL ACTION AGAINST YOU AND ANYONE ELSE USING OR SELLING THE SOFTWARE WITHOUT A LICENSE. BY INSTALLING, DOWNLOADING OR USING THE SOFTWARE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE INSTALLING, DOWNLOADING OR USING THE SOFTWARE (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THESE TERMS AND CONDITIONS AND CREATE A BINDING CONTRACT BETWEEN YOU AND AVAYA INC. OR THE APPLICABLE AVAYA AFFILIATE ("AVAYA").

Copyright

Except where expressly stated otherwise, no use should be made of the Documentation(s) and Product(s) provided by Avaya. All content in this documentation(s) and the product(s) provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part, including any code and software. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Third Party Components

Certain software programs or portions thereof included in the Product may contain software distributed under third party agreements ("Third Party Components"), which may contain terms that expand or limit rights to use certain portions of the Product ("Third Party Terms"). Information regarding distributed Linux OS source code (for those Products that have distributed the Linux OS source code), and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply to them is available on the Avaya Support Web site: <http://support.avaya.com/Copyright>.

Trademarks

The trademarks, logos and service marks ("Marks") displayed in this site, the documentation(s) and product(s) provided by Avaya are the registered or unregistered Marks of Avaya, its affiliates, or other third parties. Users are not permitted to use such Marks without prior written consent from Avaya or such third party which may own the Mark. Nothing contained in this site, the documentation(s) and product(s) should be construed as granting, by implication, estoppel, or otherwise, any license or right in and to the Marks without the express written permission of Avaya or the applicable third party. Avaya is a registered trademark of Avaya Inc. All non-Avaya trademarks are the property of their respective owners.

Downloading documents

For the most current versions of documentation, see the Avaya Support. Web site: <http://www.avaya.com/support>

Contact Avaya Support

Avaya provides a telephone number for you to use to report problems or to ask questions about your product. The support telephone number is 1-800-242-2121 in the United States. For additional support telephone numbers, see the Avaya Web site: <http://www.avaya.com/support>

New in this release

The following sections details what's new in *Avaya VPN Client Release Notes — VPN Client Software Release 10.04.016* (NN46110-411).

- [“Features”](#)
- [“Other changes”](#)

Features

- This release provides support to editions of Windows XP, Windows Vista and Windows 7 operating systems. See [“Supported platforms” on page 17](#) for a full list of supported editions.
- On XP, this release provides domain logon through a Two-Step logon. See [“Domain logon on XP using Two-step login” on page 17](#) for information on XP login.
- This release added automatic proxy detection. See [“Automatic proxy detection” on page 17](#) for more information on automatic proxy detection.
- This release fixed a mobile adaptor support issue in Windows 7. See [“Mobile Broadband Adapter support” on page 18](#)

Other changes

See the following section for information about changes that are not feature-related.

Document changes

The following information is updated for this release:

- [“Fixes and Enhancements in this Release” on page 19](#)

Customer service

Visit the Avaya Web site to access the complete range of services and support that Avaya provides. Go to www.avaya.com or go to one of the pages listed in the following sections.

Navigation

- “Getting technical documentation” on page 7
- “Getting product training” on page 7
- “Getting help from a distributor or reseller” on page 8
- “Getting technical support from the Avaya Web site” on page 8

Getting technical documentation

To download and print selected technical publications and release notes directly from the Internet, go to www.avaya.com/support.

Getting product training

Ongoing product training is available. For more information or to register, you can access the Web site at www.avaya.com/support. From this Web site, you can locate the Training contacts link on the left-hand navigation pane.

Getting help from a distributor or reseller

If you purchased a service contract for your Avaya product from a distributor or authorized reseller, contact the technical support staff for that distributor or reseller for assistance.

Getting technical support from the Avaya Web site

The easiest and most effective way to get technical support for Avaya products is from the Avaya Technical Support Web site at www.avaya.com/support.

Preface

These release notes contain the latest information about Avaya VPN Client Version 10.04.016.

Before you begin

This document is intended for network managers who are responsible for the Avaya VPN Client. It is assumed that you have experience with windowing systems or graphical user interfaces (GUI) and familiarity with network management.

Text conventions

This guide uses the following text conventions:

- | | |
|--------------------------|---|
| angle brackets (< >) | Indicate that you choose the text to enter based on the description inside the brackets. Do not type the brackets when entering the command.
Example: If the command syntax is <code>ping <ip_address></code> , you enter <code>ping 192.32.10.12</code> |
| bold Courier text | Indicates command names and options and text that you need to enter.
Example: Use the <code>show health</code> command.
Example: Enter <code>terminal paging {off on}</code> . |
| braces ({}) | Indicate required elements in syntax descriptions where there is more than one option. You must choose only one of the options. Do not type the braces when entering the command.
Example: If the command syntax is <code>ldap-server source {external internal}</code> , you must enter either <code>ldap-server source external</code> or <code>ldap-server source internal</code> , but not both. |

brackets ([])	Indicate optional elements in syntax descriptions. Do not type the brackets when entering the command. Example: If the command syntax is show ntp [associations] , you can enter either show ntp or show ntp associations . Example: If the command syntax is default rsvp [token-bucket {depth rate}] , you can enter default rsvp , default rsvp token-bucket depth , or default rsvp token-bucket rate .
<i>italic text</i>	Indicates new terms, book titles, and variables in command syntax descriptions. Where a variable is two or more words, the words are connected by an underscore. Example: If the command syntax is ping <ip_address> , <i>ip_address</i> is one variable and you substitute one value for it.
plain Courier text	Indicates system output, for example, prompts and system messages. Example: File not found.
separator (>)	Shows menu paths. Example: Choose Status > Health Check.
vertical line ()	Separates choices for command keywords and arguments. Enter only one of the choices. Do not type the vertical line when entering the command. Example: If the command syntax is terminal paging {off on} , you enter either terminal paging off or terminal paging on , but not both.

Related publications

For more information about the Avaya VPN Client, refer to the following publications:

- *Avaya VPN Client — Configuration* (NN46110-509) introduces the client product and provides information about initial setup and configuration.

- *Avaya VPN Client — Installation and Upgrades* (NN46110-412) provides information about required tasks to install and upgrade the Client software.
- *Avaya VPN Router Configuration — Tunnel Guard* (NN46110-307) provides information about configuring and using the Tunnel Guard feature.

Hard-copy technical manuals

To print selected technical manuals and release notes free, directly from the Internet, go to www.avaya.com/support. Find the product for which you need documentation, then locate the specific category and model or version for your hardware or software product. Use Adobe Reader to open the manuals and release notes, search for the sections you need, and print them on most standard printers. For more information about a free copy of the Adobe Reader, go to the Adobe Systems Web site: www.adobe.com.

Chapter 1

Overview

The Avaya VPN Client version 10.04 release includes all software fixes to date.

Supported platforms

This release provides support to the following Windows Single and Dual processor 32 and 64 bit operating system versions:

- Windows 7: Home Basic, Home Premium, Professional, Enterprise and Ultimate
- Vista: Home Basic, Home Premium, Business, Enterprise, and Ultimate
- XP: Home, Professional, and Tablet

Domain logon on XP using Two-step login

AVC provides PLAP feature for domain logon on Vista and Windows 7 operating systems. On XP, domain logon is achieved through a Two-Step logon.

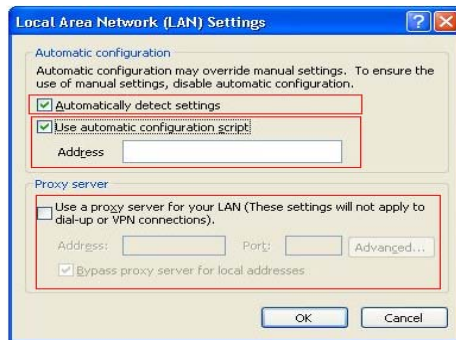

For information about how to login AVC on Windows XP, see *Avaya VPN Client — Configuration* (NN46110-509).

Automatic proxy detection

Release 10.01 detected only manually configured proxy information in Internet Explorer while 10.04 can also detect:

- Automatic proxy detection using WPAD (Web Proxy Auto discovery Protocol)
- Automatic proxy detection using PAC script files (Proxy Auto Configuration)

Figure 1 Automatic Proxy Detection

Mobile Broadband Adapter support

The following issue was fixed in Release 10.04: Windows 7 users can not establish VPN connection over the Mobile Broadband (MB) internet connection, but they can establish VPN connection on the same machine over WLAN connection.

Chapter 2

Issues and considerations

This chapter describes issues resolved and considerations that apply to Version 10.04.016 of the Avaya VPN Client.

Fixes and Enhancements in this Release

The following table lists issues fixed in AVC release 10.04.012

Table 1 Bugs fixed

Bug	Issue
Q02011571	Profiles can be edited while <code>NoChangeProfile</code> is set to true
Q02046562	Authentication fails in response only software token's new pin mode on Windows Vista
Q01961497-01	Enforcing screen saver password protection causes tunnel disconnection on 64-bit Windows Vista
Q02066665	Using RSA SecureID soft token for IPSec tunneling may cause authentication failure and unexpected exit
Q02036006	Added support of mobile broadband adapter on Windows 7
Q01922730	Added support for shortcut customization
Q01990731-01	Added support for CA certificate of user store
Q01925340	Added support for CRL verification of SSL server certificate
Q02088759	DNS Info is not getting deleted from registry even after an IPSec tunnel is disconnected
Q02087058	Added support for disconnect dialog's customization
Q02082665	DNS functionality is working intermittently
Q02069244	Certificate authentication fails with AVG
Q02065100	SSL tunnel up fails after upgrade install
Q02101997	Some vendors' NAT boxes may cause SSL tunnel time out

Table 1 Bugs fixed

Bug	Issue
Q02094191	Unable to bring up SSL tunnel with a server certificate that does not have CRL information
Q01778272-02	Added support for proxy auto configuration (PAC)
Q02050715	Added new parameter <code>HideDriverInstallWarningMsg</code> in <code>NvcSetup.ini</code> to control whether to hide the driver install warning messages on XP
Q02035248-01	Added support for installation in system account
Q02056359	File upload slow for IPSec Tunnel on Windows 7 and Vista
Q02118110	On very rare occasions, disconnecting IPSec tunnel may cause BSOD

Version 10.04 considerations

You must have administration privileges to install the VPN Client and you must copy the Client installation files to a local drive. You can lose network connectivity for a short time during the Client installation, but connectivity returns after the installation. In some instances, this causes problems with running network applications. To avoid any problems, always exit all programs before starting the installation process.

Q01887509 — IPsec tunnels send a passive keepalive every 15 seconds

In order to work around a possible issue with traffic flows timing-out in Microsoft Vista, the client sends passive keepalive packets to the server at an interval of 15 seconds.

Q01881759 — Long delays at launch

In some cases the launching of the AVC application may take longer than expected. In extreme cases the delay may be two or more minutes. Such a symptom may be due to .NET CRL checking behavior associated with an application that has a Microsoft Authenticode signature. Microsoft has documented this as a known issue with .NET Framework and has made a fix available. You can find more information on .NET at <http://support.microsoft.com/kb/936707>. Note that Avaya provides the necessary exe.config file mentioned in the MS KB article. This file is put into place by the client installation.

Q01925268 — 10.01 AVC: Inaccurate packet capture with Wireshark

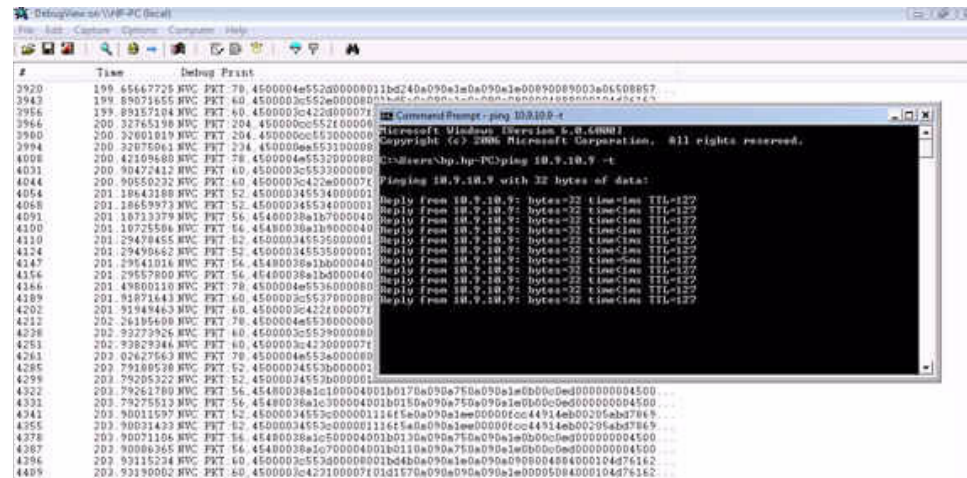

Live packet capture currently not supported with AVC 10.01 client in this release. Use the following workaround using DebugView. Please see the following CR for more details: **Q01927820 — Please enhance the format of clear text packets.**

To capture packets with DebugView and convert the captured file into a .cap file, complete the following:

- 1 From AVC, chose **Edit the profile, Manage Options**, and then check **Enable dumping clear text packets**.
- 2 From your desktop, right-click on DebugView, and open with administrative rights on Vista.
- 3 From the DebugView Filter window, create a filter for NVC PKT. to remove extra information from DebugView, Type **nvc.pkt** into the **Include** box and then click **OK**.
- 4 From DebugView, click **Capture** from the overhead menu, and then select the following options for packet capturing:
 - Capture Win32
 - Capture Kernel
 - Enable Verbose Kernel Output
 - Pass-Through
 - Capture Events

- Bring up the tunnel and start passing data. Logged packets in DebugView appear as shown in the following figure.

Figure 2 DebugView logs

- After capturing enough packets, from DebugView chose **File, Save** to save the log.
- From your desktop, right-click on the NVCPacketParser Utility, and open with administrative rights on Vista. The Packet Parser window appears. From the Packet Parser window, click **File, Open** to open the created log file.
- From Packet Parser, click **File, Convert** to convert the log file into a .cap file.
- You can now use WireShark for opening and analyzing the capture.

Q01906688 — Application launch: Pre launch is not working for failover profiles.

Application prelaunch is not supported for failover profiles.

Q02060663 — Other users' profiles won't be uninstalled

Private profiles are stored under each user's private directory. When a user (including system account) uninstall the client, other users' profiles won't be uninstalled.

Q02051419 — Modifying an installed AVC is not supported

Once AVC is installed, it can only be uninstalled or upgraded. The "Modify" option is not supported.

Q02106133 — Attempt to bring up SSL tunnel second time through PLAP fails

In AVC PLAP, if users bring up an SSL tunnel, disconnect it, and then try to connect again, they will get an error of "VPN Adapter activation failed".

Version 10.04 known anomalies

The following sections describe issues that Avaya has determined to need to be corrected in a future release, but are not fixed in the current release.

Q01932592 — PLAP with certificates on smartcards is not functioning correctly

You cannot use the Prelogon Access Provider (PLAP) functionality in conjunction with digital certificate authentication. For PLAP to work with digital certificates, it requires a smartcard however, at this time, smartcards are not supported with PLAP. When you attempt to make a connection, the error message `Failed to connect to following reason: Authentication failure` appears. You can use digital certificates, including those used with smartcards, for VPN authentication but not with PLAP.

Q01934399-01 — Certificate authentication using subj alt name on 10.01 AVC client not working

When using subject alternative name certificate authentication on release 10.01 AVC, the client software sends only the first character for email and DNS subject alternative name. For ipaddress subject alternative name, an error shows during authentication on the AVR event log.

Q01930877 — 10.01 AVC: After the tunnel is down the remote desktop stops working

After raising a tunnel and then disconnecting it, when you try to connect with the Remote Desktop to the PC, the Remote Desktop stops working.

Q01953716 — VPN Client 10.01 when installed with Juniper client causes Blue Screen

Windows systems with VPN Client version 10.01 and Juniper Odyssey client may experience blue screens. It is not recommended to attempt to host both clients on the same PC. This issue is under investigation by Avaya.

Q01955020 — 10.01 AVC: PLAP loading status icon failure

In rare cases the status icon might not appear automatically if a VPN tunnel is established before the user has logged on to Windows Vista. Start the VPN client manually to make the status icon appear in the system tray.

Q01959272 — 10.01 AVC client: Blue screen due to OfficeScan kernel error

A blue screen of death occurs when you configure the OfficeScan Firewall on a PC. This issue is caused by the kernel stack overflow error when connecting to the Virtual Private Network (VPN). This is known issue documented from Trend Micro web site at <http://esupport.trendmicro.com/support/viewxml.do?ContentID=EN-1036319&id=EN-1036319>. To resolve this, apply the latest patch for OSCE 8.0 and restart your PC.

Q01961512 — 10.01 AVC client: ghost tunnel on AVR if AVC tunnel fails (screen saver)

A ghost tunnel will appear on the AVR if the screen saver password or Client Screen Saver Activation Time fails. This does not happen on clients older than 10.01 because older clients send ISAKMP packets to disconnect and 10.01 does not.

This is present on both 32 bit and 64 bit operating systems.

Q01963942 — 10.01 AVC client: GUI does not launch with PLAP after the service is stopped

The GUI does not launch with PLAP after the PLAP service is stopped.

Q02102587— No PIN prompt for SmartCard authentication on Windows 7 and Vista

On Windows 7 and Vista, certain vendors' smart cards don't pop up PIN prompt when user tries to connect. The client simply goes directly to the Connect status window and will stay there indefinitely. This is because AVC's calling process is a service and those smart cards don't fully support service on Windows 7 and Vista (due to "Session 0 isolation"). So far, we found Aladdin eToken working fine with our client while Gemalto v5.5 and SafeNet iKey 2000/2032 having issues with PIN prompt.

Q02066099— Installing v10.x client after uninstalling of a legacy client (pre 10.01) needs a reboot in between

Before installing a v10.x client (v10.01 and later) on a machine that had a legacy client (pre v10.01) just uninstalled, a reboot must be performed. Otherwise, connecting the newly installed v10.x client may fail with "general system error".

In v10.04 installer, a check has been added to detect the existence of legacy client. If it's detected, a warning message will block the installation and instruct user to uninstall the old client first and then reboot. The warning also reminds users to back up their profiles and configuration before uninstall.

AVC v10.01 installer doesn't have this check. In case users run into the situation that both the legacy client and v10.01 get installed, it's very important to follow procedure below to clean up the machine:

- 1** Uninstall 10.01.
- 2** Reboot the machine.
- 3** Repair the legacy client. Go to Control Panel (set it to classic view)->Programs and Features->right click on the legacy AVC and select Repair.
- 4** Uninstall the legacy AVC.
- 5** Reboot the machine.
- 6** Now, the machine is ready for a new install of v10.04.

Restricted product—export license requirement

This product incorporates encryption technology that is highly restricted and can require an export license from the US Department of Commerce, Bureau of Export Administration, prior to international shipment.

A product that incorporates encryption with a key length up to 56 bits can be eligible for international shipment pursuant to a license exception. However, any product that incorporates encryption technology exceeding 56 bits requires an export license from the US Department of Commerce.

Pursuant to such license, the product can be marketed and sold only to a limited class of international users. Any entity, other than Avaya, that wants to export this product must first obtain license approval from the US Department of Commerce.

Further, the user of this product cannot re-export, transfer, or divert the product to any country to which such re-exports are restricted or embargoed under United States export control laws and regulations, or to any national or resident of such restricted or embargoed countries, or provide the product to any military end user or for any military end use, including the design, development, or production of any chemical, nuclear, or biological weapons.

Appendix

OpenSSL License

Third Party Terms for Avaya VPN Client release 10.01 through 10.04 (December 2008- February 2010)

Certain portions of the product ("Open Source Components") are licensed under open source license agreements that require Avaya to make the source code for such Open Source Components available in source code format to its licensees, or that require Avaya to disclose the license terms for such Open Source Components. For a period of three years from your date of purchase of a product containing any of the software listed below from Avaya Inc., any Avaya affiliate or an authorized Avaya reseller, we will provide upon request a complete machine readable copy of the source code for such Open Source Component on a medium customarily used for software interchange for a charge no more than our cost of physically performing source distribution. To get access to the source code, you may contact Avaya at (408) 577-7666.

The Open Source Components are provided "AS IS". ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR THE CONTRIBUTORS OF THE OPEN SOURCE COMPONENTS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THE PRODUCT, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The following component is licensed under the OpenSSL license:

Component	Copyright
openssl	Copyright (C) 1995-1998 Eric Young. All rights reserved. Copyright (c) 1998-2004 The OpenSSL Project. All rights reserved

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.
