New Features in This Release

None

Old Features Removed From This Release

None

Problems Resolved in This Release

Nortel Networks* Contivity* VPN Client sustaining release Version 6.01.102 fixes the following issues:

Q01238330 –

The Nortel VPN Client may not allow users to select the appropriate certificate during configuration if the certificate is issued by a subordinate Certification Authority (CA). An error message “Failed to verify issuer certificate” is also displayed on the VPN certificate selection screen.

Q01241479 –

When the Nortel VPN Client is used with a Toshiba Tablet PC, the Nortel VPN Client may crash as indicated by the intermittent flashing of a Microsoft Blue screen.

Q01257968 –

The Nortel VPN Client may crash if more than 128 Inverse split tunneling networks are defined.

Q01226168 –

When InfoExpress VS client software is installed on a Windows 2000 or XP system, the Nortel VPN Client may become unresponsive when connecting to a Nortel VPN Router using NAT traversal.

Q01277387 –

When Microsoft Loop back Adapter is installed, the EACFilt driver may not bind to it, and the Nortel VPN Client can not be launched.

Q01297125 –

A Windows Mobile-based Device adapter triggers an error message indicating failure to bind to Eacfilt driver, when the Contivity VPN Client is launched

Q01304216 –

The Nortel VPN Client may become unresponsive and stop sending data, when substantial bidirectional traffic is transmitted over an established tunnel.

Q01308927 –

When upgrading to the 6.01.100 Client the Group password is not saved properly. This requires the user re-enter the group password in order to connect successfully.
