Purpose: Software Release to address customer software issues

2. Important Notes Before Upgrading to This Release

None

3. Platforms Supported

Microsoft Windows Vista

4. Notes for Upgrade

For details on how to upgrade your Nortel VPN Client, please see the "Nortel VPN Client Patch Notes" for Version 6.07 (Part No. 311773-S Rev 01), available at <http://www.nortel.com/support>. (Select the **Security & VPN** product family, select **VPN Client**, select **Technical Documentation**, then click **GO**).

5. Version of Previous Release

Software Version 6.07.026

6. Compatibility

No issues

7. Changes in This Release

New Features in This Release

None

Old Features Removed From This Release

None

Problems Resolved in This Release

Q01606688 –

In some cases a Nortel VPN Client connection using mandatory tunneling mode may fail to pass traffic when traversing a Microsoft PPP-based RAS adapter. This issue causes connection problems for dial-up for analog modems and some cellular data cards present themselves as RAS connections. The inability to pass traffic results in the tunnel being torn down due to the banner test (initial data passage test) failing.

8. Outstanding Issues

None

9. Known Limitations

None

10. Documentation Corrections

None

For other known issues, please refer to the product release notes and technical documentation available from the Nortel Technical Support web site at: <http://www.nortel.com/support>.
