7. Changes in This Release

New Features in This Release

None

Old Features Removed From This Release

None

Problems Resolved in This Release

Nortel Networks* Contivity* Secure IP Services Gateway sustaining release Version 4.85.211 resolves the following issues:

Q00751763 -

Closing the Java Applet after configuring VPN Router Firewall policies may cause task errors to be displayed, resulting in the policy being lost.

Q01060824 -

The Nortel VPN Router may core during the processing of an authentication packet through the Hardware Accelerator module if the authentication packet verification fails and the hardware simultaneously reports a non-fatal memory transfer (DMA) error.

Q01076568 -

When a Nortel VPN Router receives fragments with both MF and DF bits set and the Statefull Firewall or Interface Filters is enabled, an "ICMP destination unreachable: fragmentation needed" message may be returned to the caller if the reassembly of the fragments prevents the packet from being forwarded out another interface.

Q01172417 – A recent security vulnerability fix (CR Q01117695) caused an incompatibility with the Nortel VPN Client and the processing of IKE keepalive messages.

8. Outstanding Issues

None

9. Known Limitations

None

10. Documentation Corrections

None
