Problems Resolved in this Release

Nortel VPN Tunnel Guard sustaining release Version 3.0.2.0_003 resolves the following issues:

Q01369354 –
With the NVR TG configuration set to leave a session in Restricted Mode, the Tunnel Guard client will only alert a failure with Restricted Mode on an initial log in when the client fails an SRS check. In subsequent NVC login attempts, no TunnelGuard popups occur and the TunnelGuard icon indicates Compliant

Q01731188 –
The custom install option for the 3.01.0 Nortel TunnelGuard Agent returns errors indicating missing files.

Q01769642 –
When adding an entry in software definition on a Nortel TunnelGuard Agent there is an operating system option at the bottom of the input dialog. The Vista OS is not available.

Q01782211 –
The Nortel TunnelGuard administration tool may not act upon the version field of an "on disk' entry if it is configured before the "path" field.

Q01800893 –
The Nortel VPN Tunnel Guard does not recognize a rule containing a directory name that includes the trailing "\"

Q01832263 –
In the Nortel TunnelGuard Administration Tool an incorrect behavior may appear if the Specific Date/Time Range option is selected after the Relative Date/Time Range option.

Q01906193 –
A Nortel TunnelGuard Rule using the NOT constructor may return success even though the entire expression results in a failure.
